

Global Macro Trends

Εν αναμονή της διακυβέρνησης Τραμπ και των πολιτικών της

Διεθνείς Μακροοικονομικές Τάσεις

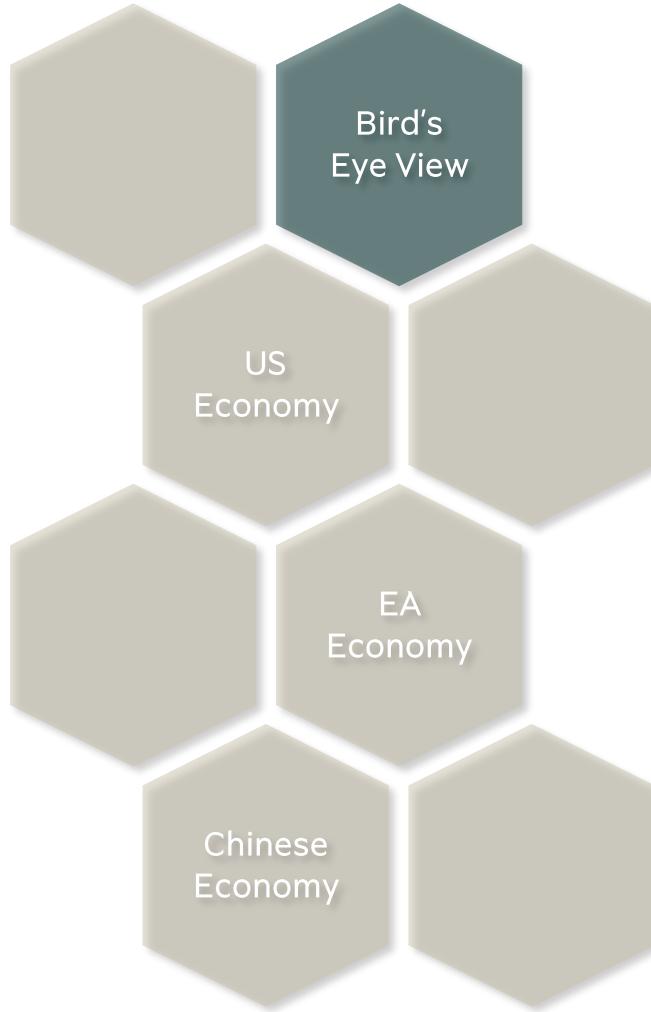

- Οι εξελίξεις τόσο στις ΗΠΑ όσο και στην παγκόσμια οικονομία χαρακτηρίζονται από μεγάλο βαθμό αβεβαιότητας καθώς είναι άμεσα εξαρτημένες από την εφαρμογή ή μη των πολιτικών του επερχόμενου προέδρου των ΗΠΑ, Ντόναλντ Τραμπ. Η τρέχουσα αβεβαιότητα είναι ιδιαίτερα αυξημένη εξαιτίας του γεγονότος ότι αυτή εκπορεύεται από 3 γενεσιούργούς παράγοντες. Ο πρώτος αφορά στις πολιτικές και οικονομικές πρωτοβουλίες του προέδρου Τραμπ αυτές καθαυτές. Ο δεύτερος αφορά στο χρονισμό των αποφάσεων αυτών, ενώ ο τρίτος αφορά στην ένταση και έκταση της εφαρμογής τους. Παράλληλα, οι γεωπολιτικές εξελίξεις (πόλεμος στην Ουκρανία, εξελίξεις στη Μέση Ανατολή) και η στάση της νέας κυβέρνησης απέναντι σε παραδοσιακούς συμμάχους, αλλά και μη, θα προσδιορίσει την κατεύθυνση προς ένα νέο παγκόσμιο στάτους κβο. Τέλος, σημαντική αβεβαιότητα γεννά και η πολιτική ρευστότητα στη Γερμανία, τη Γαλλία και τον Καναδά.
- **Στις ΗΠΑ**, η οικονομία συνεχίζει να εκπλήσσει θετικά καθώς αναπτύσσεται με ιδιαίτερα ικανοποιητικό ρυθμό, ενώ και οι πρόδρομοι δείκτες είναι γενικά ευνοϊκοί. Ο πληθωρισμός, παρά την ελαφρά άνοδό του κατά το τελευταίο διάστημα, παραμένει σχετικά κοντά στον στόχο του 2% της Fed, επιτρέποντας την τρίτη κατά σειρά μείωση του βασικού επιτοκίου της στη συνεδρίαση του Δεκεμβρίου. Για το μέλλον, όμως, η Fed εκφράζει την προτίμησή της σε μία πιο αργή μείωση του βασικού επιτοκίου της που θα υποστηρίζεται περισσότερο από την εξέλιξη των στοιχείων, ενώ αναπόφευκτα θα λάβει υπόψη της και την πληθωριστική επίπτωση των νέων δασμών στις εισαγωγές. Οι συνθήκες στην αγορά εργασίας παραμένουν πολύ καλές καταγράφοντας σημαντική βελτίωση κατά το τελευταίο δίμηνο. Παράλληλα, οι λιανικές πωλήσεις και η προσωπική καταναλωτική δαπάνη, επωφελούμενες από την αύξηση των μισθών και το χαμηλό ποσοστό ανεργίας, συνεχίζουν να παρουσιάζουν μηνιαία άνοδο. Μια ήπια επιβράδυνση της ανάπτυξης είναι το βασικό μας σενάριο για επόμενο διάστημα.
- Στην Ευρωζώνη συνεχίζεται η πολύ ήπια οικονομική ανάπτυξη. Ωστόσο, η πολιτική ρευστότητα έχει οδηγήσει στην ανεπαρκή αντιμετώπιση των σοβαρών προκλήσεων τόσο σε εθνικό, όσο και σε επίπεδο Ευρωζώνης, με τον κίνδυνο αποβιομηχανοποίησης να προβάλλει ολοένα και πιο απειλητικός. Η δυσχερής δημοσιονομική θέση πολλών χωρών-μελών, που η γήρανση του πληθυσμού την επιβαρύνει περαιτέρω, καθιστά εξαιρετικά δύσκολη τη δυνατότητα στήριξης της οικονομίας μέσω νέας αύξησης των κρατικών δαπανών. Συνεπώς, η χαλάρωση της νομισματικής πολιτικής απομένει ουσιαστικά ο κύριος μηχανισμός στήριξης με τρόπο, όμως, που δεν θα αναζωπυρώσει τις πληθωριστικές πιέσεις. Η κατάσταση περιπλέκεται περαιτέρω από την πιθανή αύξηση των δασμών στα ευρωπαϊκά προϊόντα από τις ΗΠΑ, το υψηλότερο κόστος ενέργειας και την ενδεχόμενη μικρότερη στήριξη των ΗΠΑ στην Ουκρανία που αναπόφευκτα θα επηρεάσει και τη στάση της Ευρώπης. Από την άλλη, ενθαρρυντική είναι η ακόμα ισχυρή αγορά εργασίας.
- **Στην Κίνα**, η ισχυρή δέσμη μέτρων για τη στήριξη της οικονομίας και την αντιμετώπιση των χρόνιων προβλημάτων στην αγορά ακινήτων που ελήφθησαν το τελευταίο διάστημα φαίνεται προς το παρόν να έχει αποτρέψει τη σημαντική επιβράδυνση του ρυθμού ανάπτυξης (2024: 5%). Ωστόσο, η επιβολή περαιτέρω δασμών και απαγορεύσεων από πλευράς ΗΠΑ στις κινεζικές εξαγωγές, αλλά και εισαγωγές, αναπόφευκτα θα οδηγήσει σε νέα μέτρα στήριξης της οικονομίας, μέσω κυρίως δημοσιονομικής τόνωσης της εσωτερικής κατανάλωσης.

Global macro trends

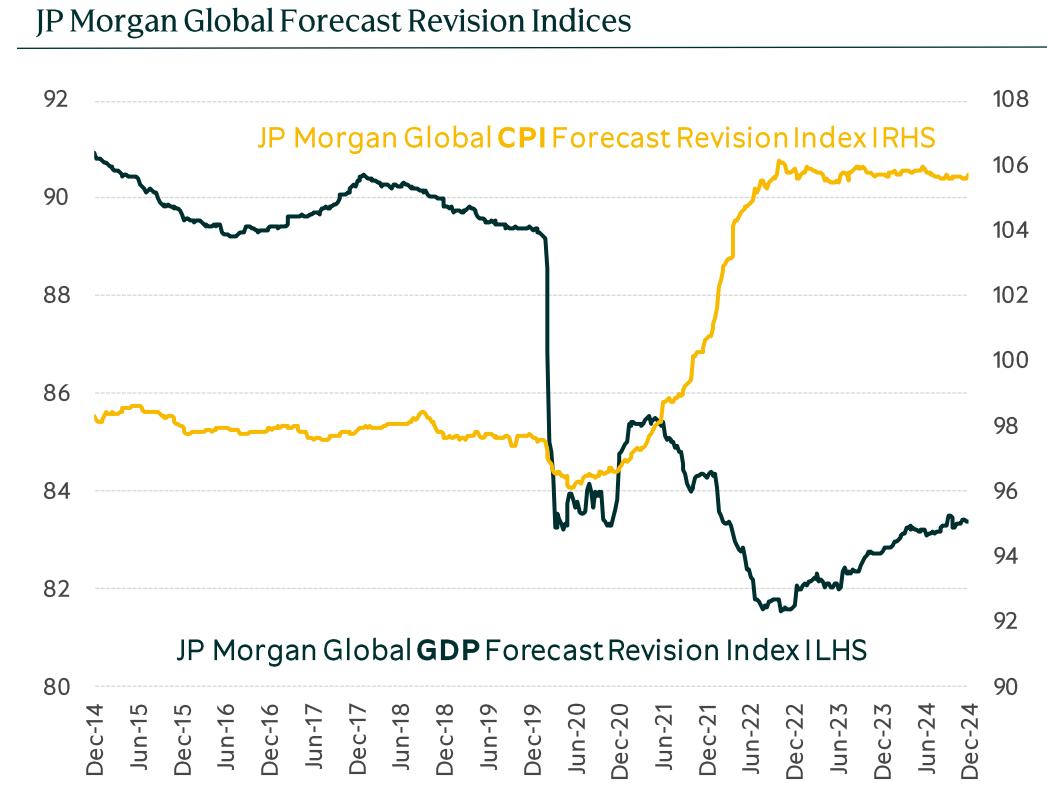

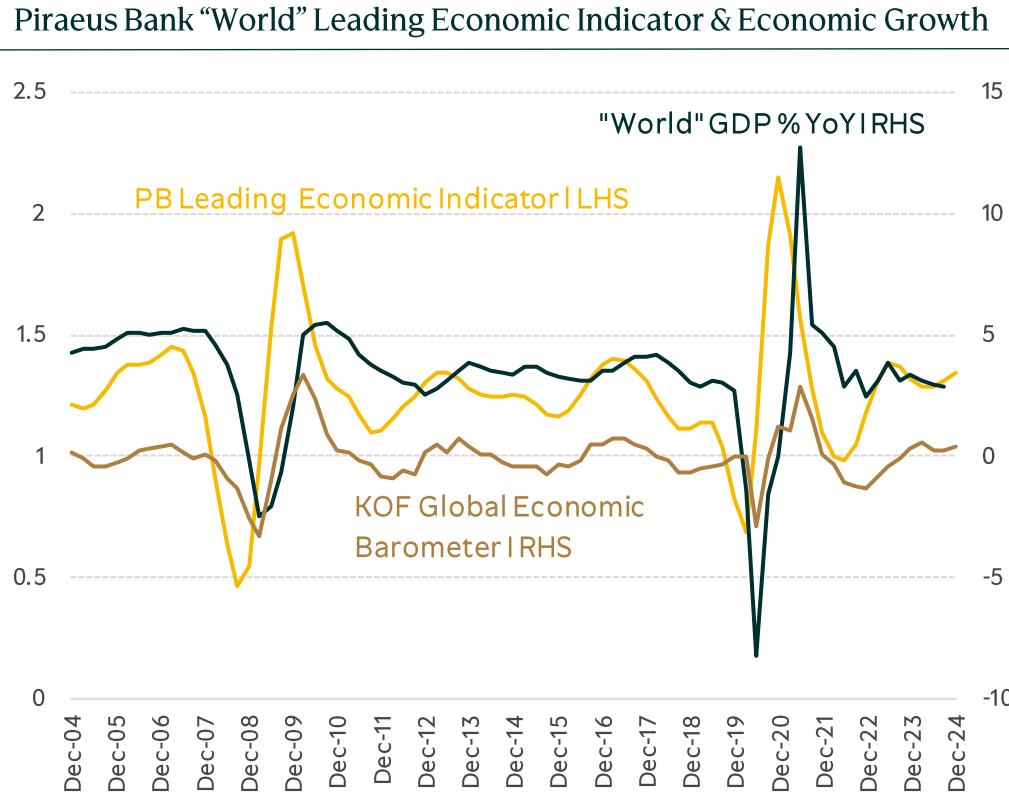

- ▶ **The developments in both the US and global economies are marked by significant uncertainty**, largely influenced by the policies of incoming US President Donald Trump. This uncertainty arises by three primary factors: the nature of President Trump's political and economic initiatives, the timing of these decisions, and the intensity and extent of their implementation. Additionally, geopolitical issues, such as the conflict in Ukraine, events in the Middle East, and the new administration's stance towards both traditional and non-traditional allies, will shape the emerging global landscape. Furthermore, political instability in Germany, France, and Canada adds to this considerable uncertainty.
- ▶ **The US economy** continues to exhibit robust growth, with leading indicators remaining generally favorable. Inflation, despite a recent slight increase, remains near the Federal Reserve's 2% target, which facilitated a third consecutive reduction of the key interest rate during the December meeting. Looking ahead, the Fed is inclined towards more gradual reductions in the key interest rate, driven by ongoing data developments, while also considering the inflationary impacts of newly imposed tariffs on imports. Labor market conditions continue to be excellent, with significant improvements observed over the past two months. Concurrently, retail sales and personal consumption expenditures, supported by rising wages and low unemployment rates, maintain a positive monthly trend. Our baseline scenario anticipates a mild slowdown in economic growth in the forthcoming period.
- ▶ **In the euro area**, economic growth remains moderate. Political changes have led to an inadequate response to challenges at both national and Eurozone levels, with the risk of deindustrialisation becoming more apparent. The fiscal position of many member countries is difficult, further impacted by ageing populations, making it challenging to support the economy through increased government spending. As a result, monetary policy easing remains the primary support mechanism, aiming to avoid reigniting inflationary pressures. The situation is further complicated by potential increases in tariffs on European products from the US, higher energy costs, and possible reduced US support for Ukraine, which could affect Europe's stance. However, the labour market remains strong.
- ▶ Recent measures implemented **in China** to support the economy and address issues in the real estate market appear to have prevented a notable slowdown in growth (2024: 5%). However, the introduction of additional U.S. tariffs and bans on Chinese exports and imports will likely result in new economic support measures, primarily through fiscal stimulus aimed at boosting domestic consumption.

US Business Cycle | Based on ISM Manufacturing Indicator

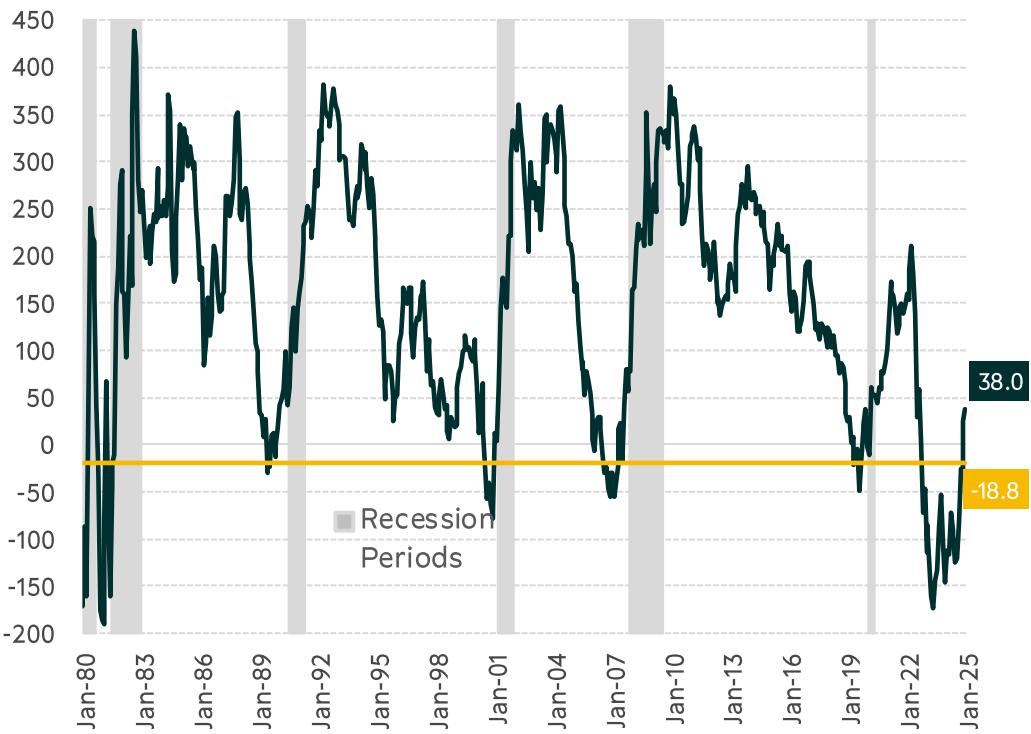

US Business Cycle | Based on Major US Economic Variables

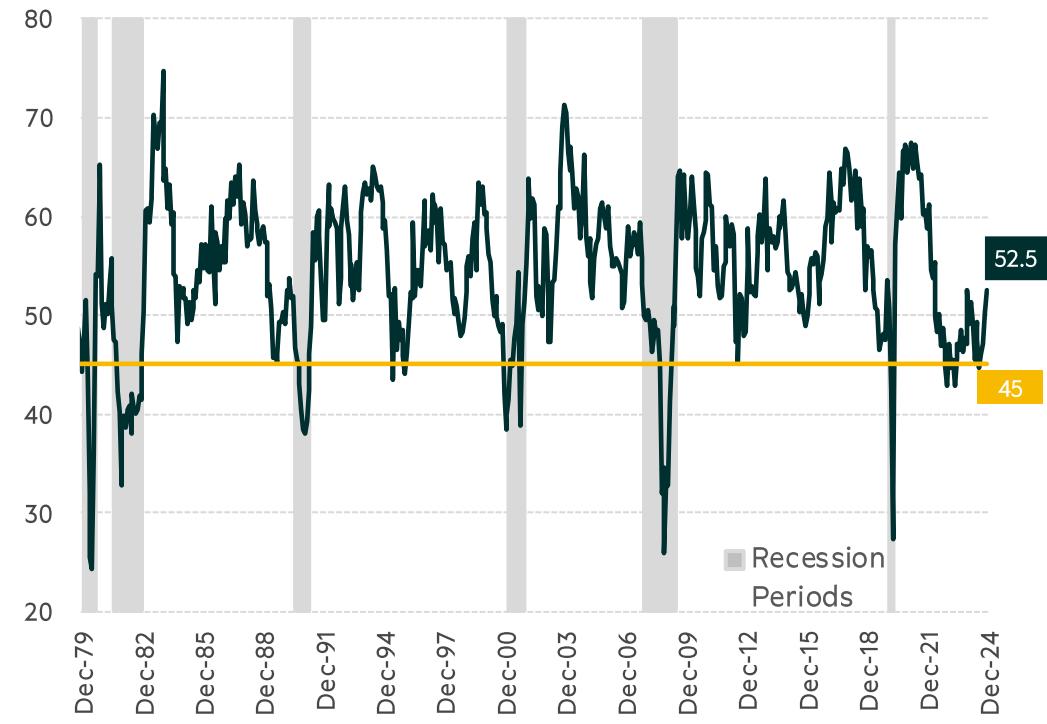

US Recession Indicators | A recession episode, in the next 12 months, is not likely based on the 10YR3M spread & the ISM New Order Index

10 Year and 3M US Treasury Yields Spread

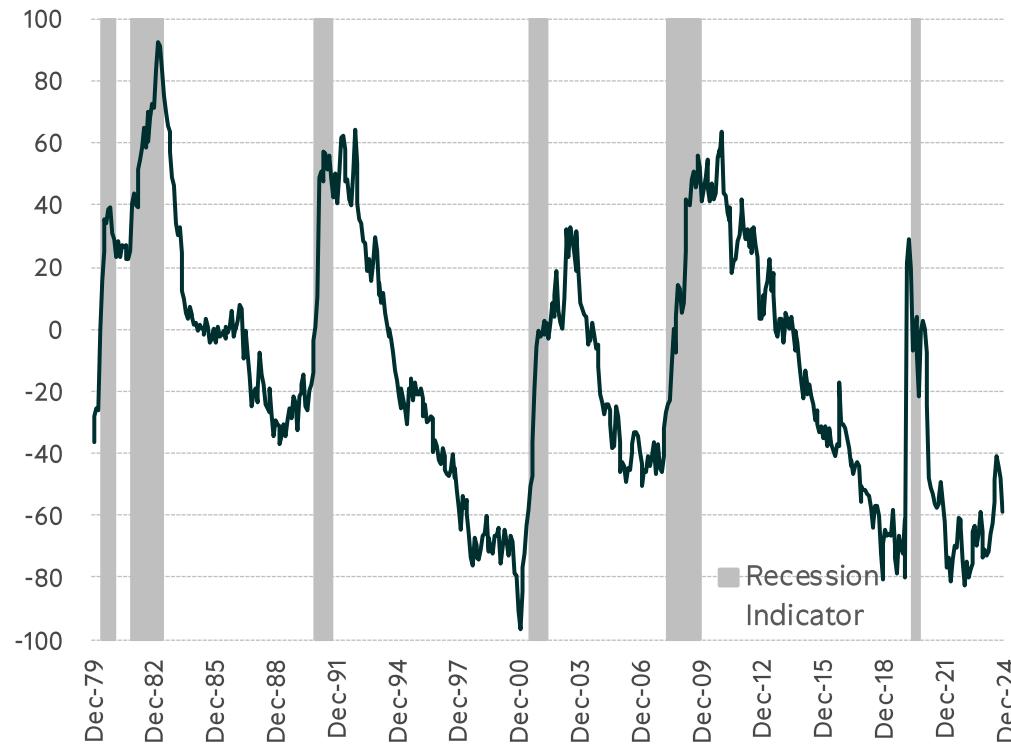

ISM Manufacturing New Order Index

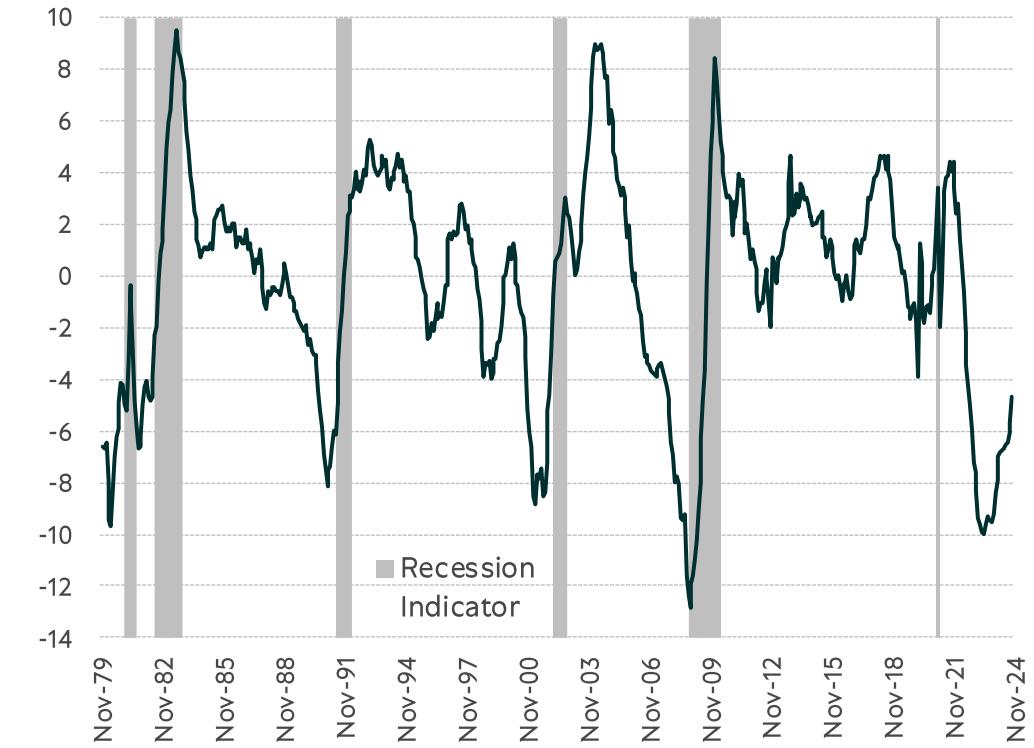

Conference Board Survey | Consumer confidence fell in December with the expectations component seeing the sharpest drop. The Leading Indicator rose in November for the first time since February 2022.

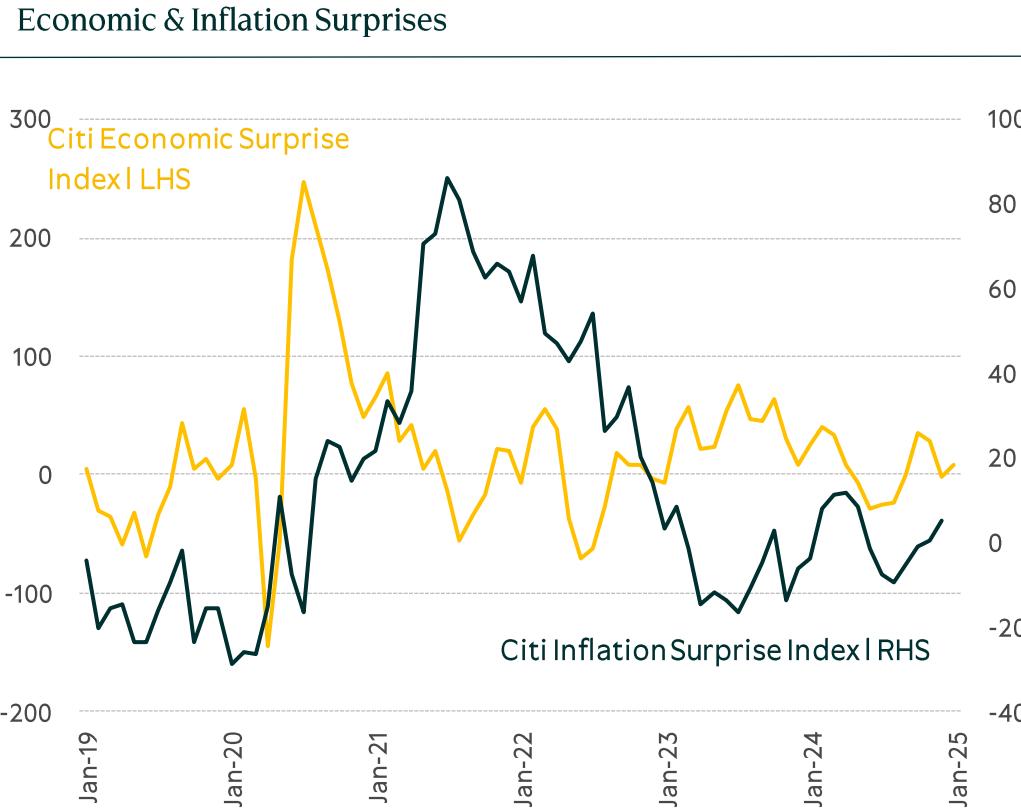

Difference between Consumer Expectations and Current Situation Indicators (Conference Board)

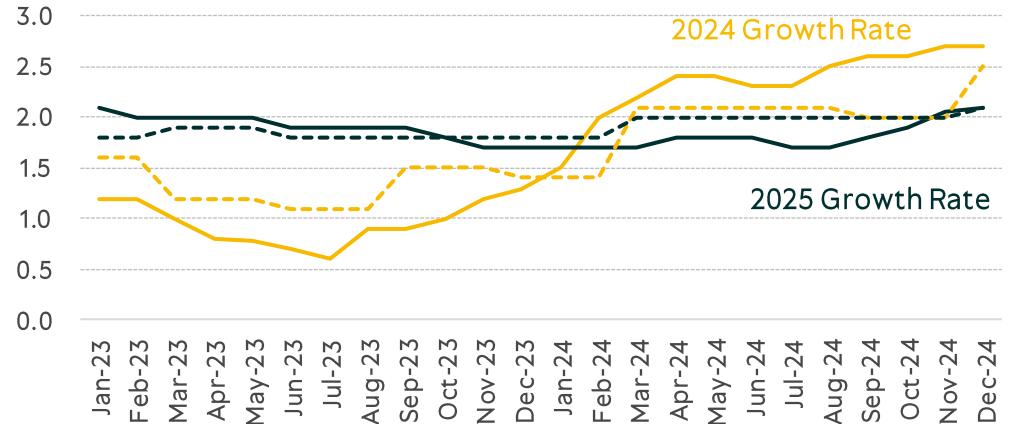

Difference between Leading & Coincident Indicators (Conference Board)

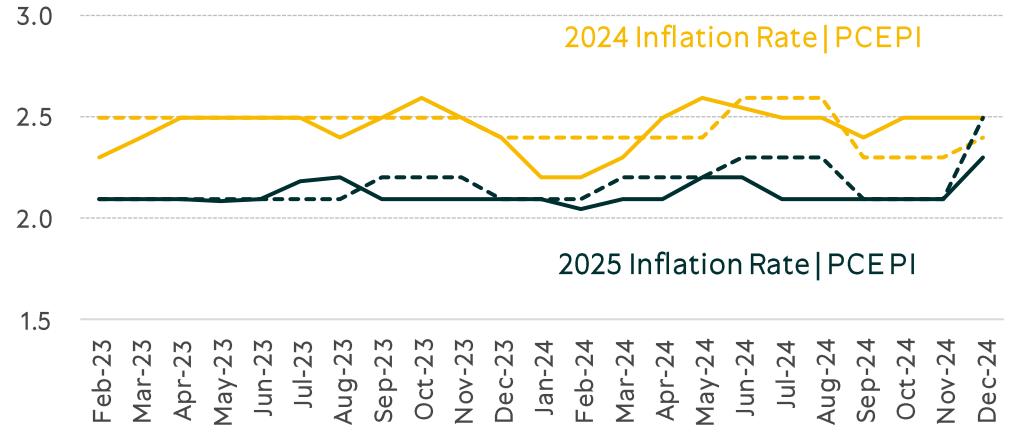

US Macro Expectations | Economic Surprises marginally positive; inflation surprises have been rising

Growth Rate Expectations*

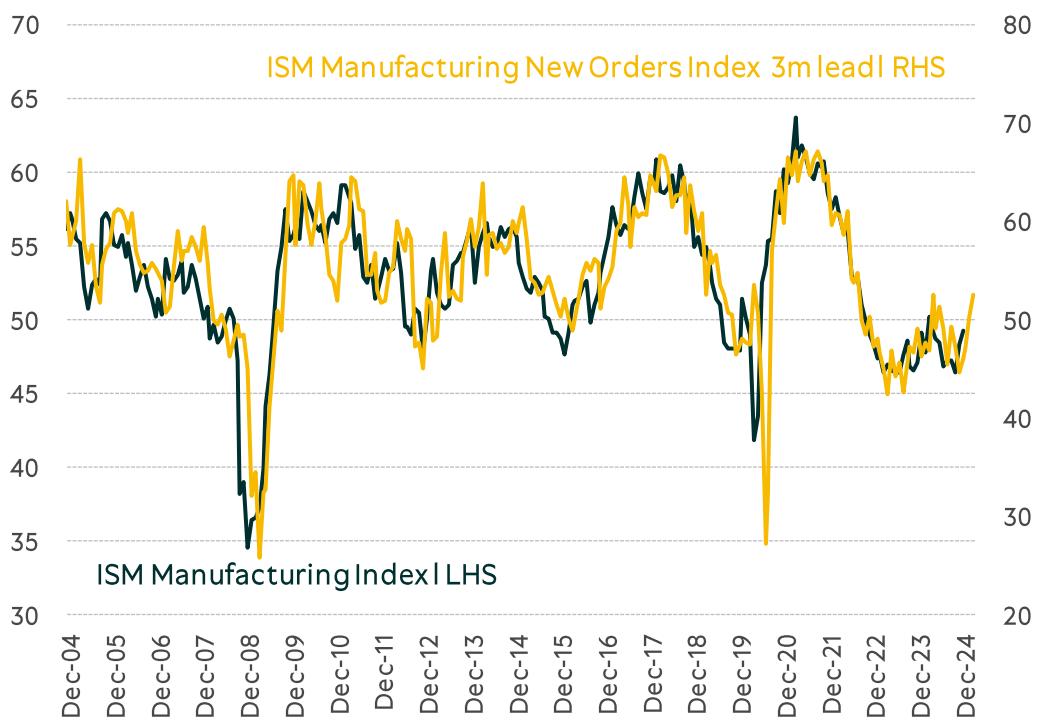

Inflation Rate Expectations*

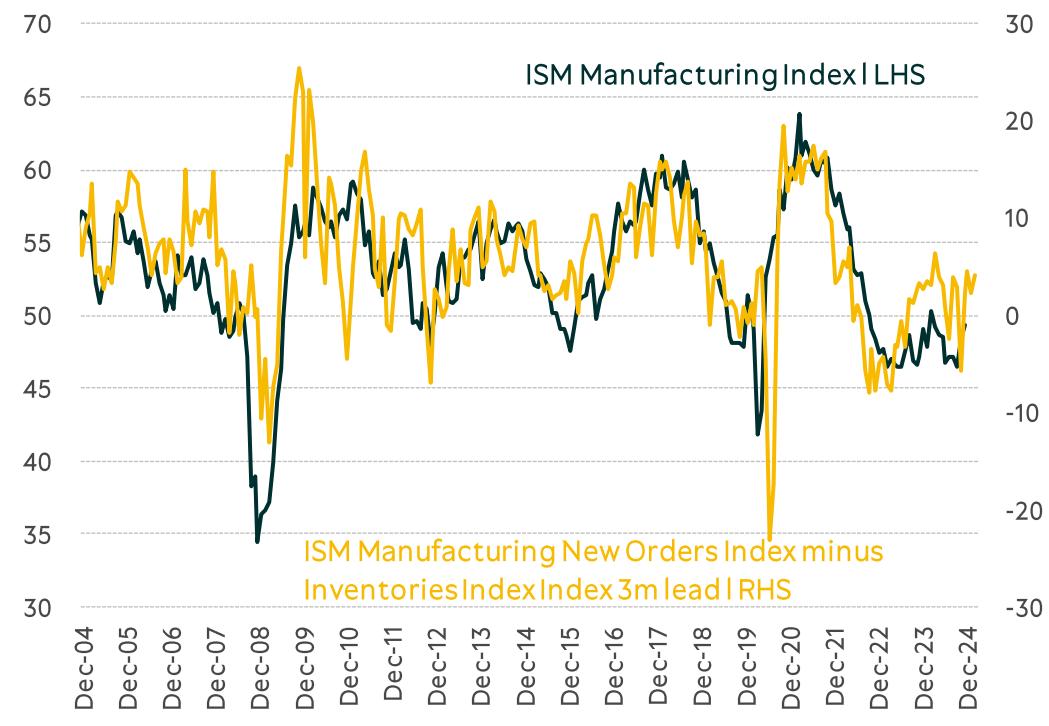

*Solid line: Consensus; Dotted line: Fed projections

US Leading Indicators | ISM Manufacturing below 50 for nine consecutive months. New Orders Index improved for the 4th month in a row (now at 52.5)

ISM Manufacturing & New Orders Indices

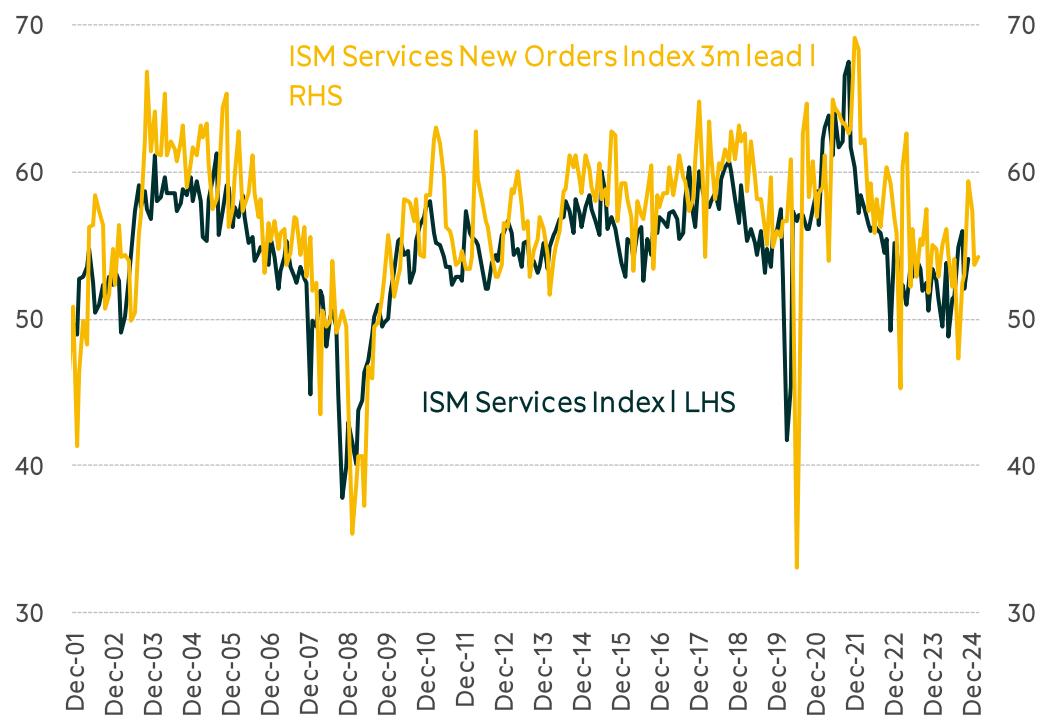

ISM Manufacturing & New Orders Index Minus Inventories Index

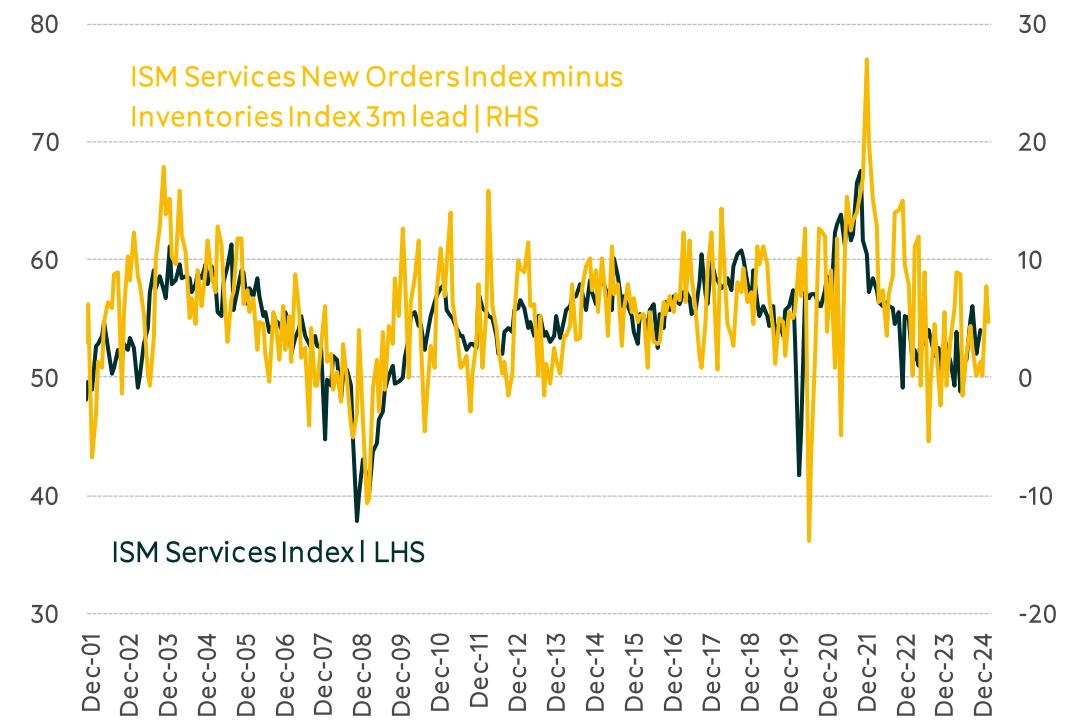

US Leading Indicators | ISM Services Index expanded strongly in December. Smaller increase in the New Orders Index

ISM Services & New Orders Indices

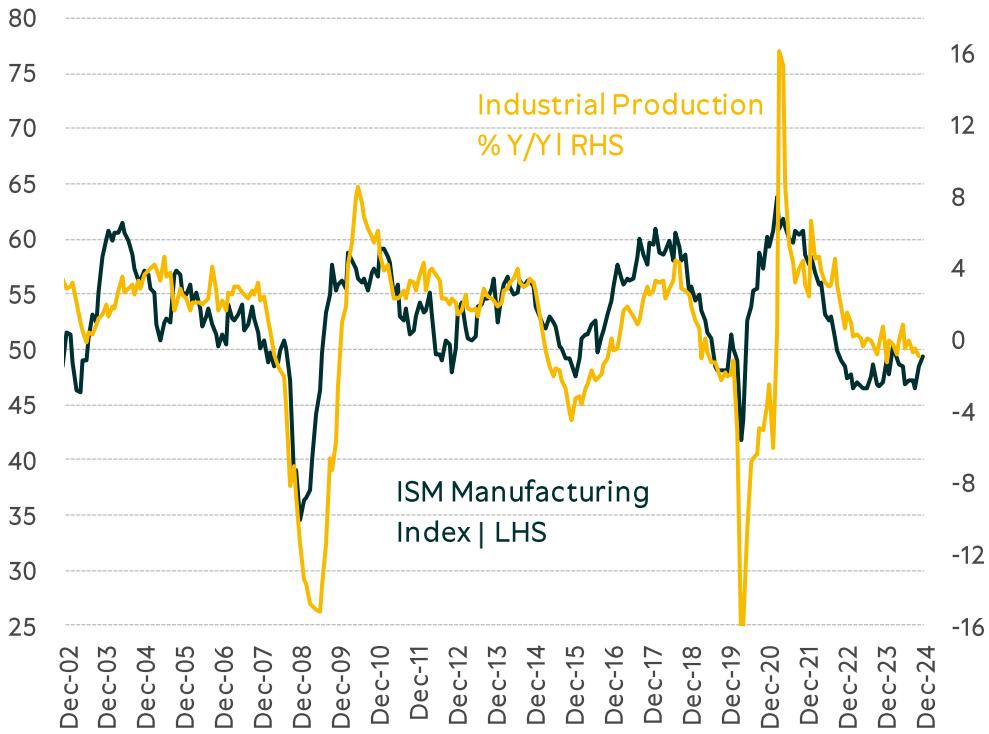

ISM Services & New Orders Index Minus Inventories Index

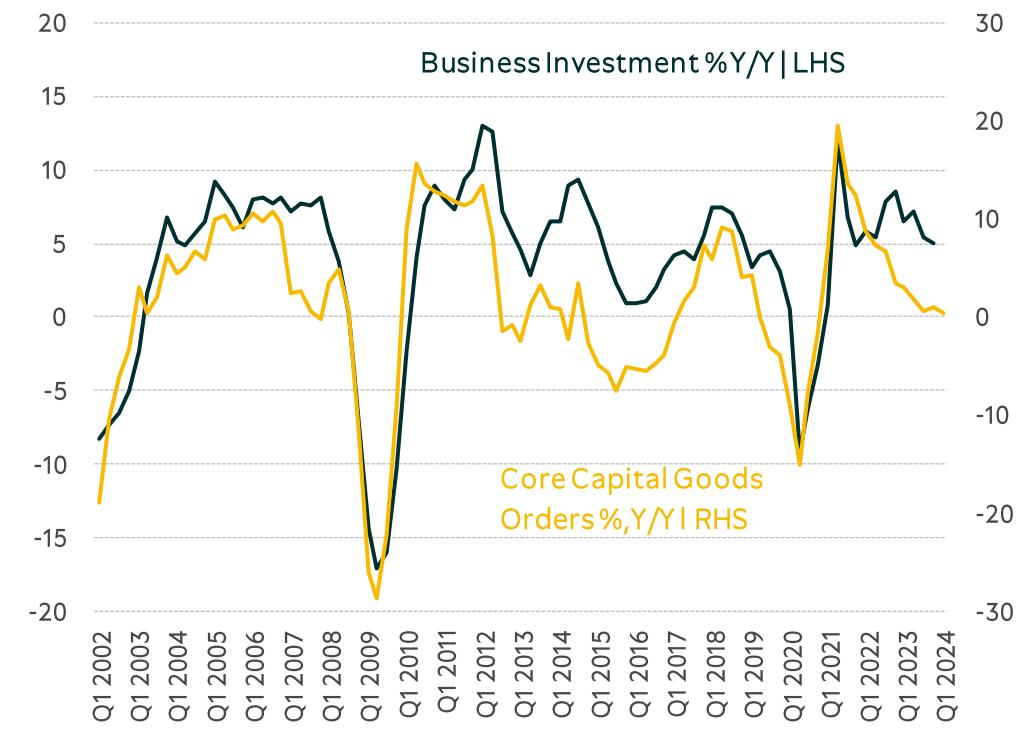

US | Industrial Production declined marginally in November. Core Capital Goods Orders have stopped declining.

Industrial Production YoY & ISM Manufacturing

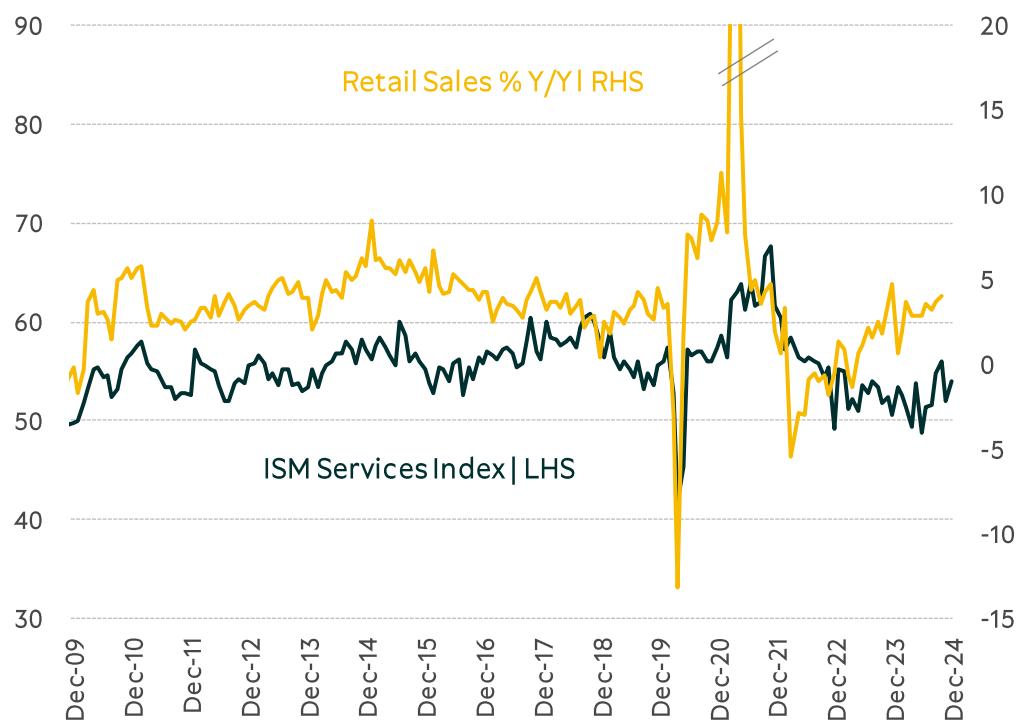

Core Capital Goods Orders & Business Investment

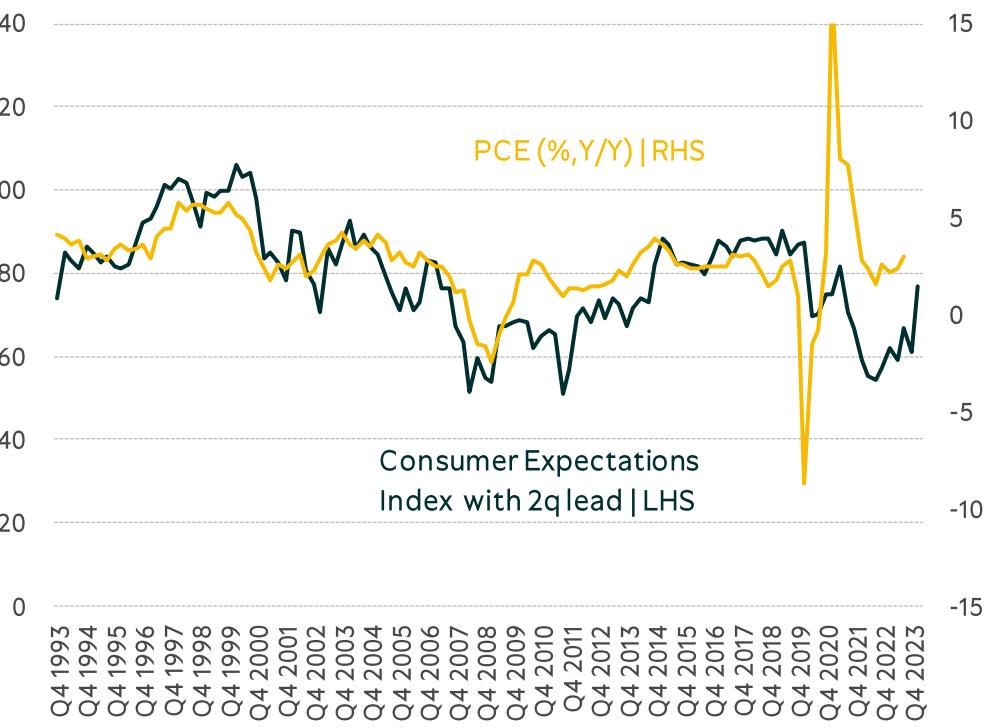

US | The US consumer is the main “growth driver” so far. Consumer sentiment rose further in December

Retail Sales YoY & ISM Services

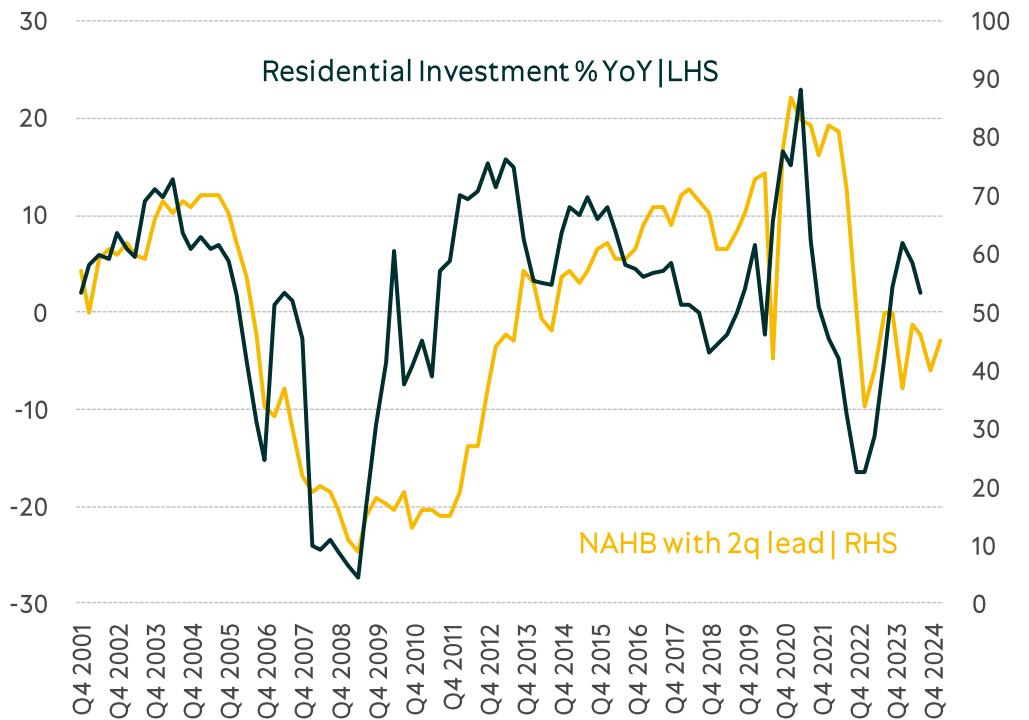

PCE & University of Michigan Consumer Expectations Index

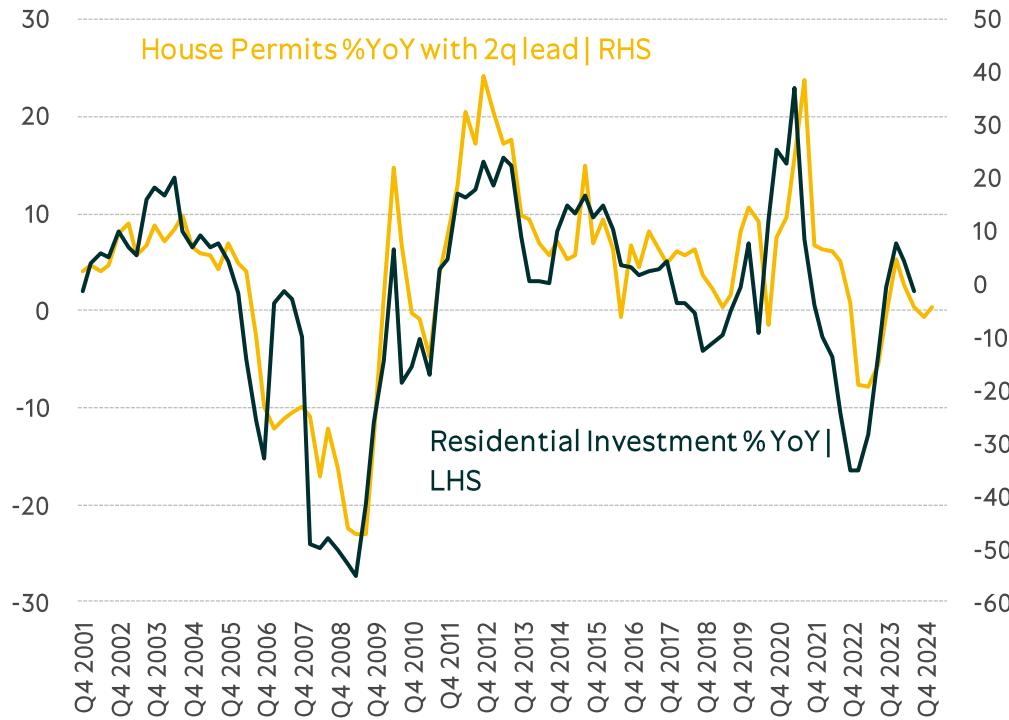

Housing Market | NAHB & House Permits still point to subdued growth in Residential Investments

Residential Investment & NAHB Index

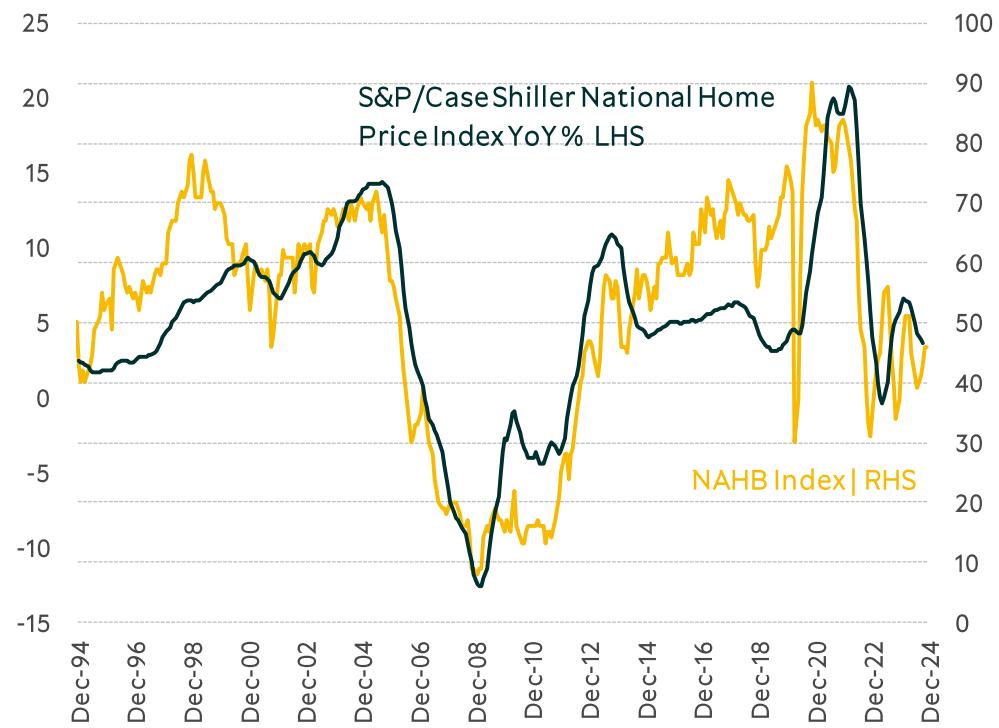

Residential Investment & House Permits

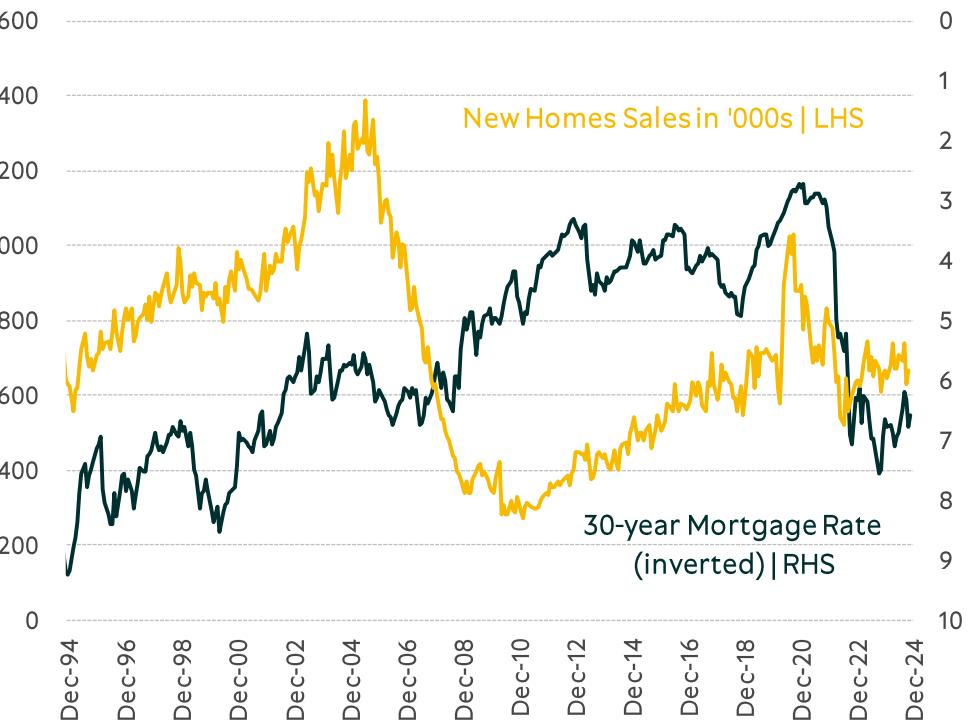

Housing Market | Homebuilder confidence remained flat in December. New home sales rose in November and December following October's big drop, amid still high 30-year mortgage rates

NAHB Index & S&P/Case Shiller Home YoY %

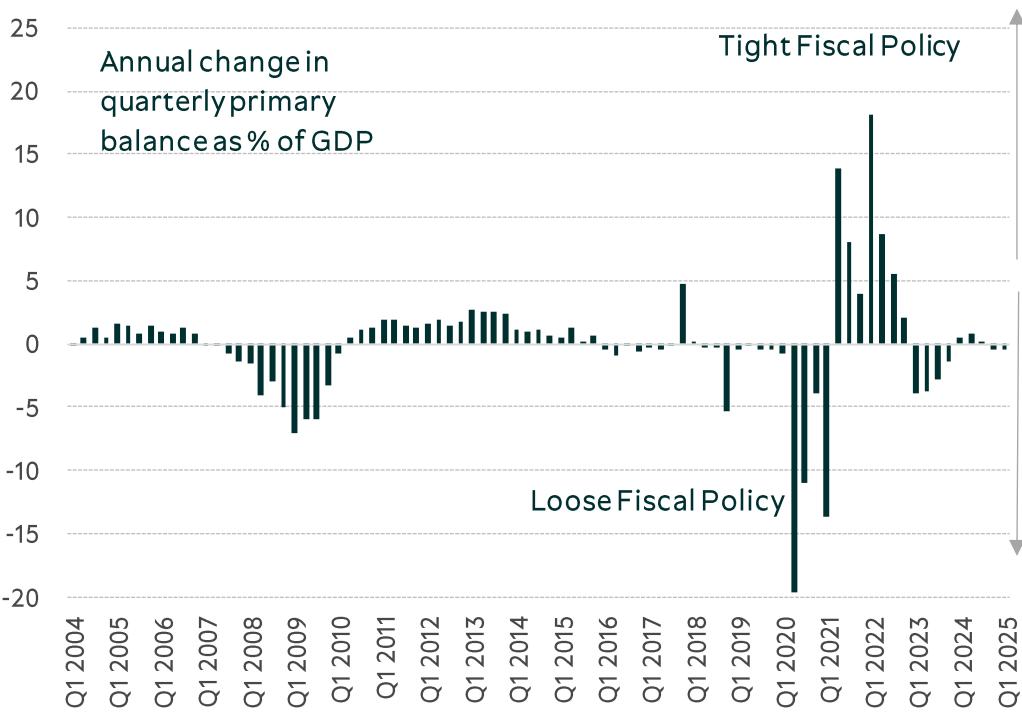

US new home sales and mortgage rates

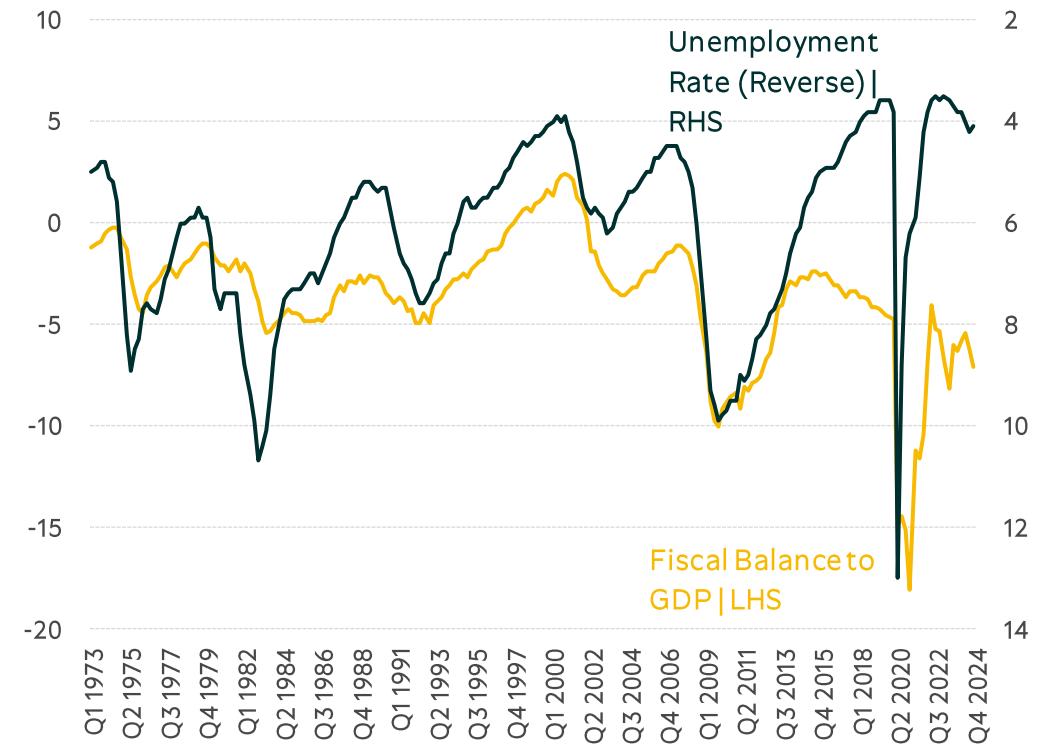

Fiscal Policy | Still too loose vs unemployment. Fiscal challenges ahead.

Fiscal Thrust

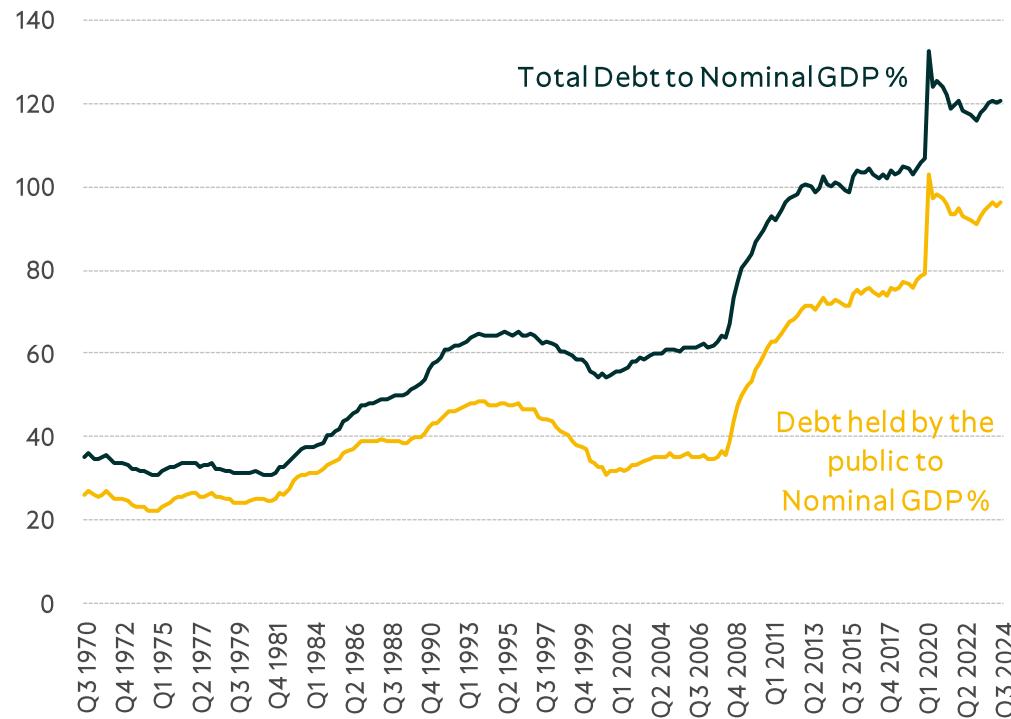

Fiscal Policy vs Unemployment

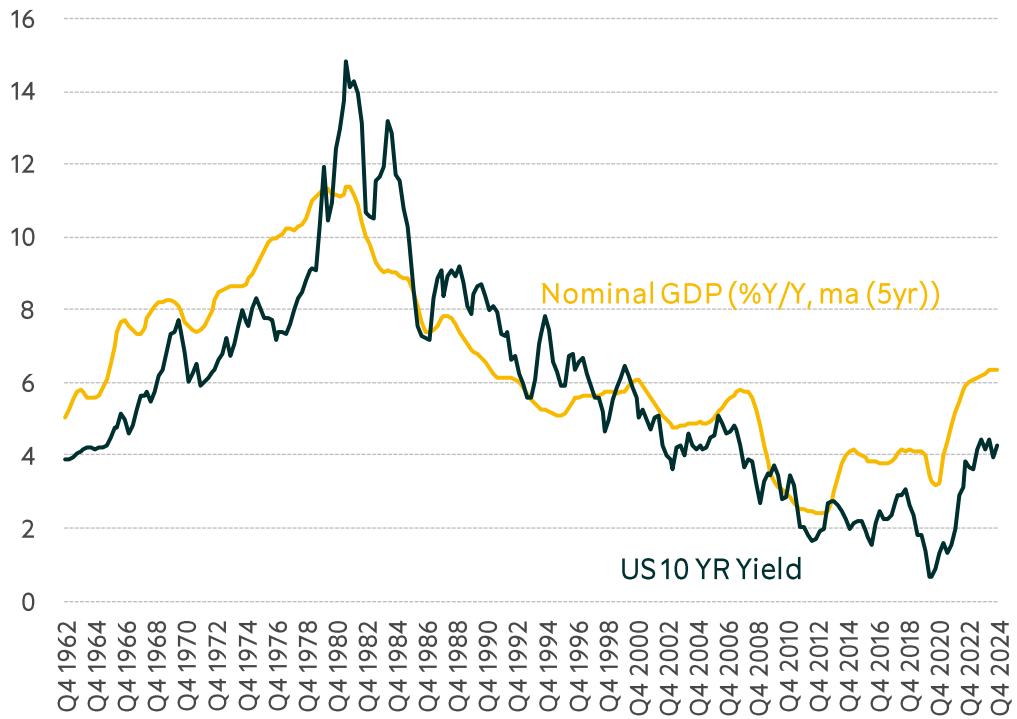

Fiscal Policy | The nominal growth rate is likely to remain at higher levels than the long-term cost of public financing

Debt / Nominal GDP (quarterly)

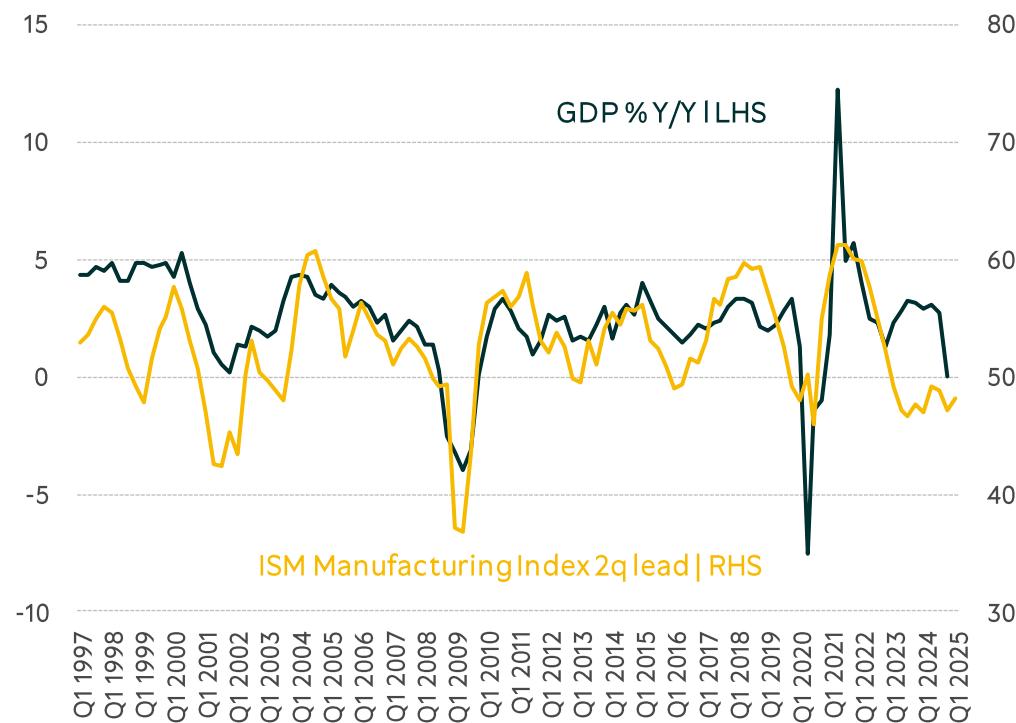

Fiscal Policy Sustainability

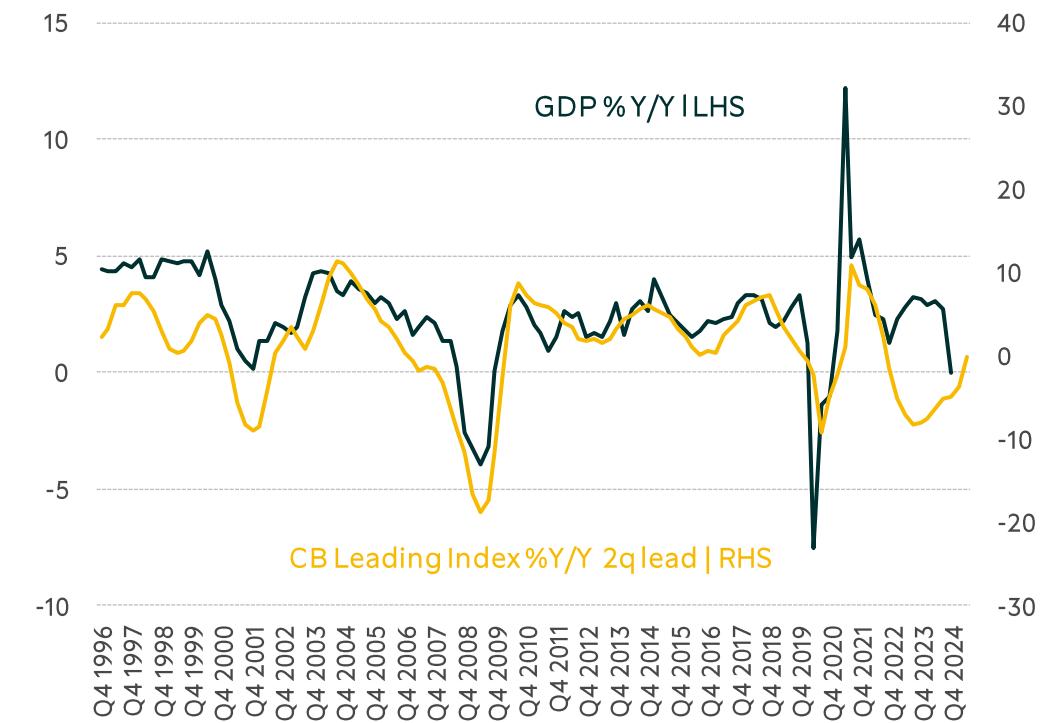

US GDP Outlook | Leading indicators have shown some improvement, less so in the manufacturing sector, suggesting a milder deceleration in real GDP

GDP & ISM Manufacturing Indicator

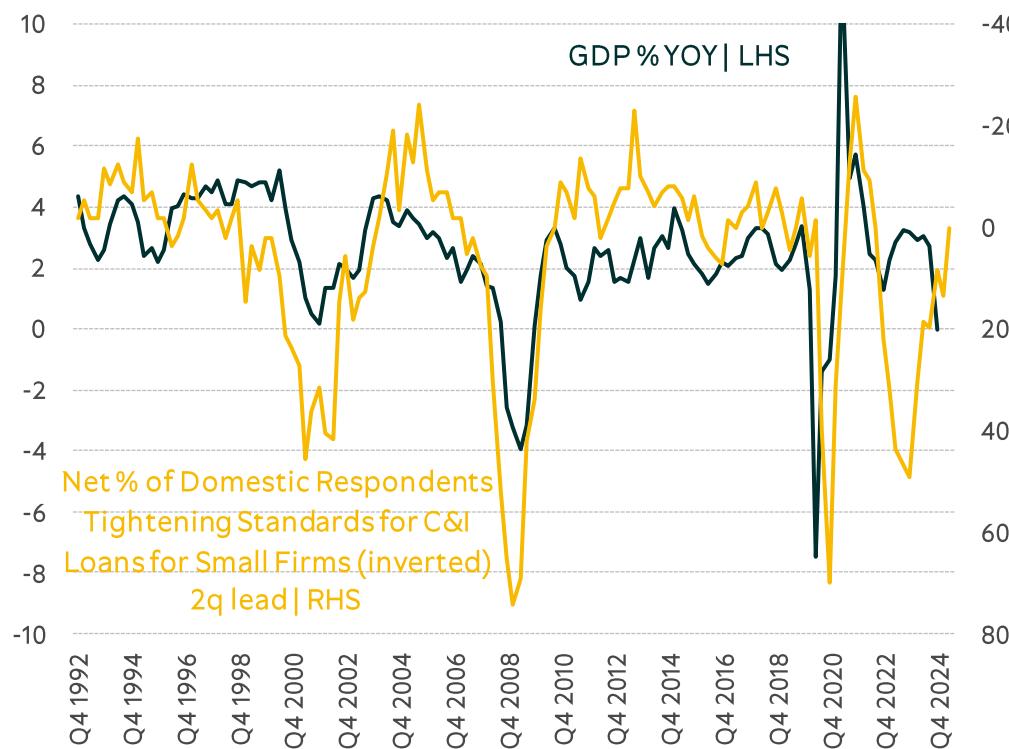

GDP & CB Leading Indicator

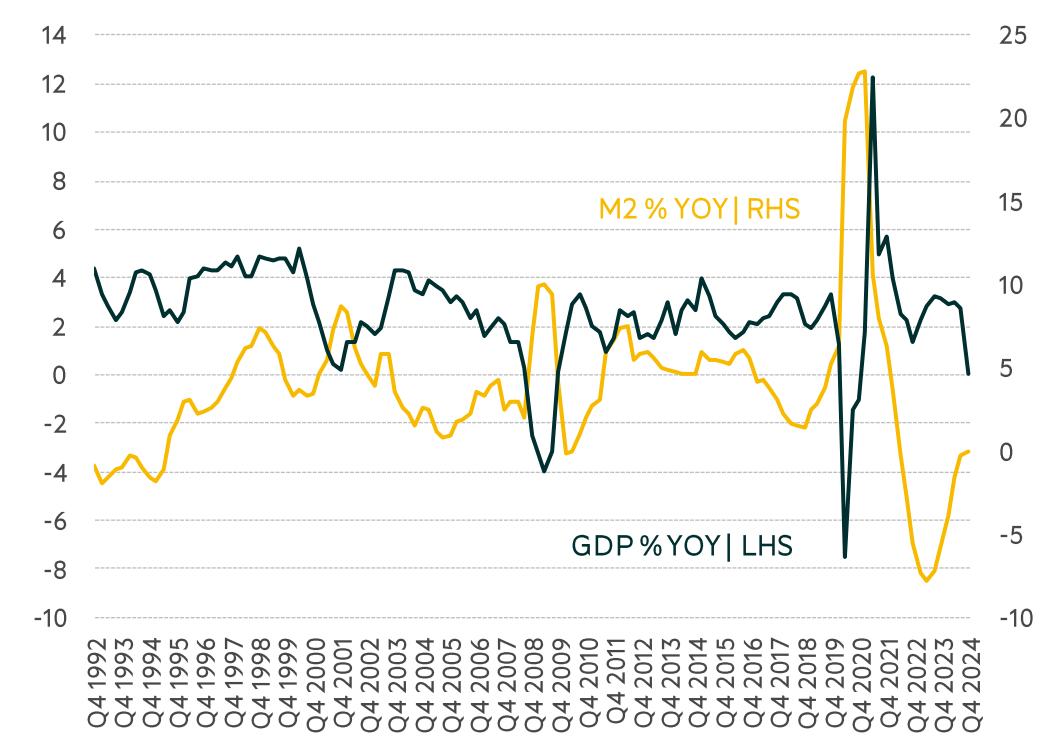

US GDP Outlook | Small increase in Tightening of Lending Standards & further improvement in M2

Senior Loan Officer Opinion Survey on Bank Lending Practices

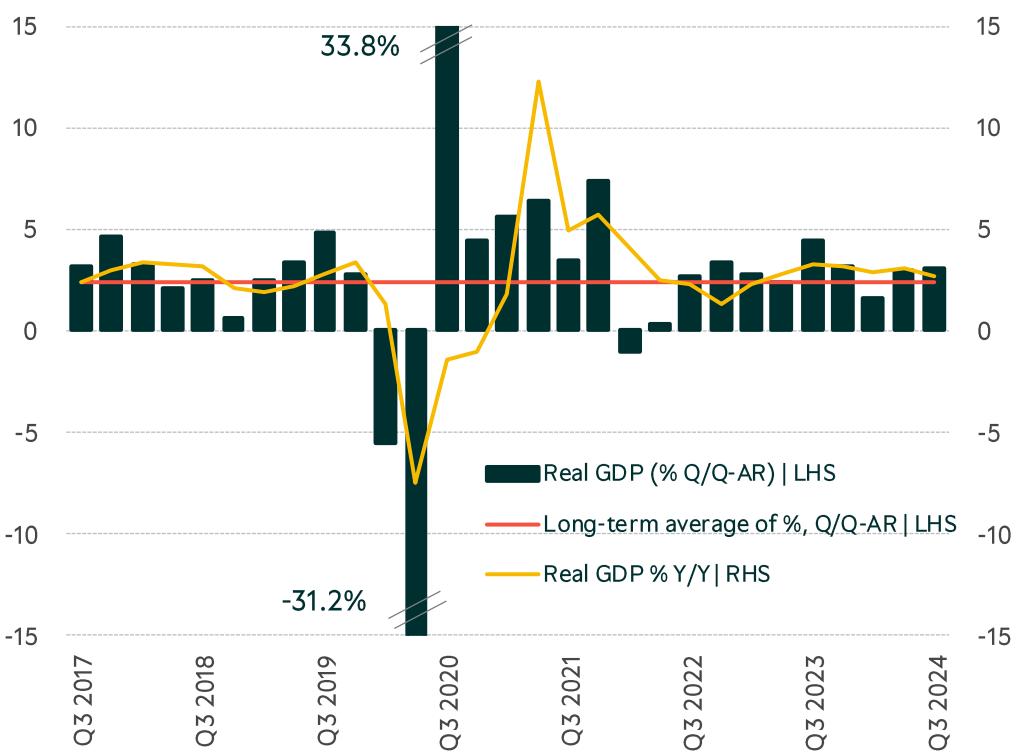

M2 growth vs GDP

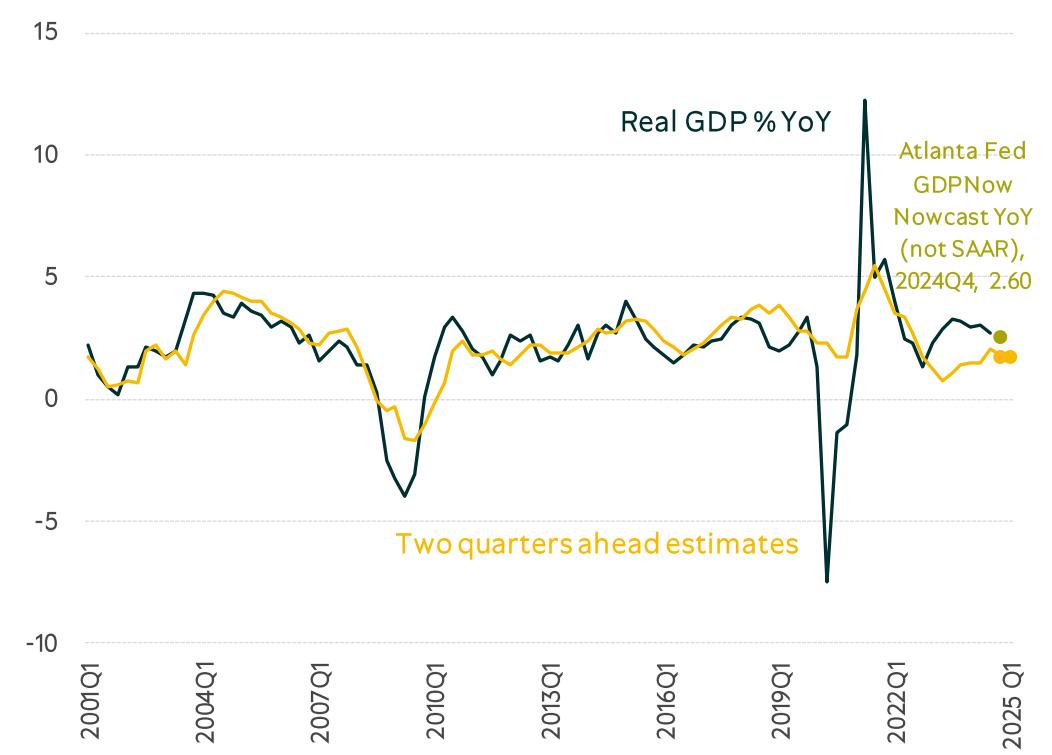

US GDP Outlook | GDP growth is projected to slow down over the next two quarters and is anticipated to grow below trend in 2025

Growth Rate Outlook

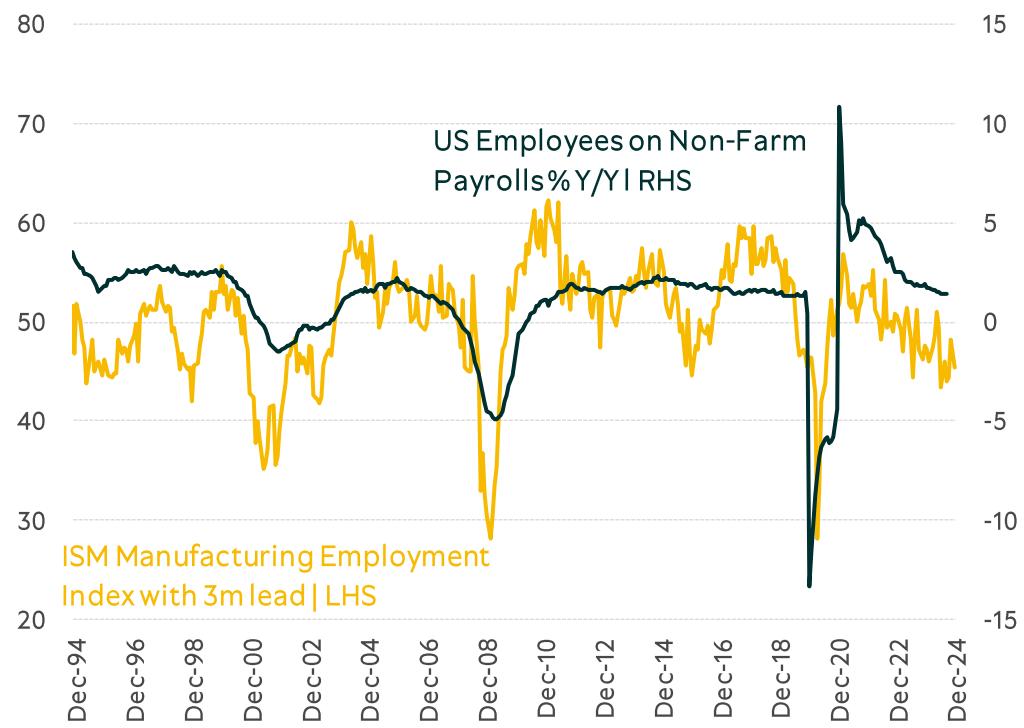

Growth Rate Estimate

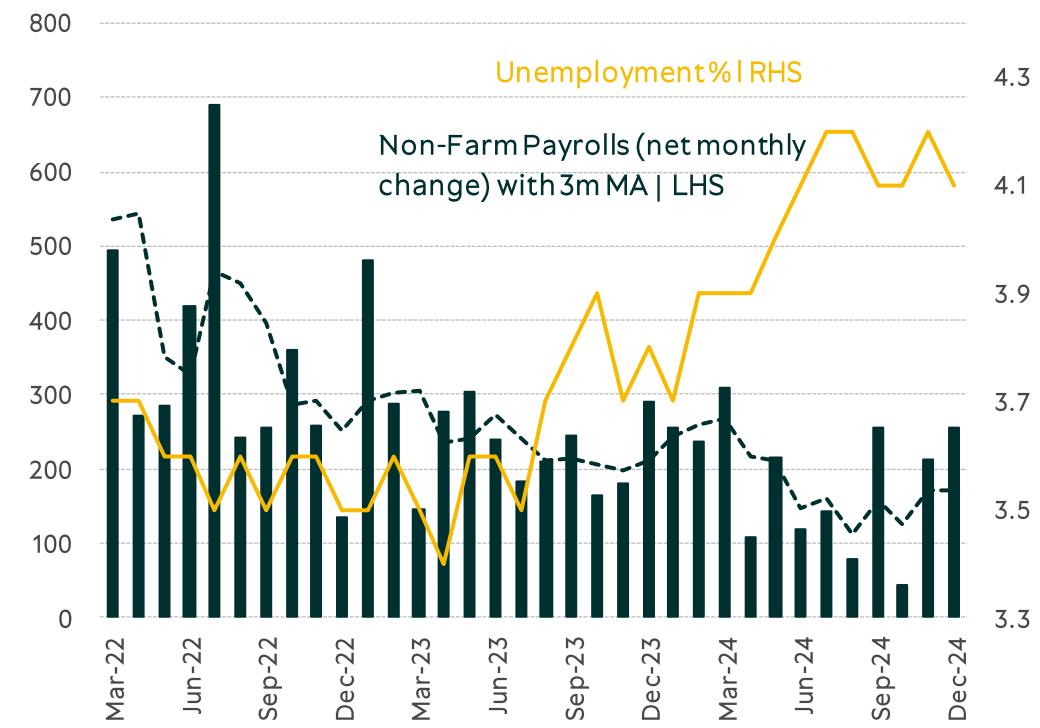

US Labor Market | The decline in the ISM Employment Index reflects ongoing challenges in the sector. Non-Farm Payrolls improved further in December and the unemployment rate fell back to 4.1%.

Employment & Leading Manufacturing Indicator

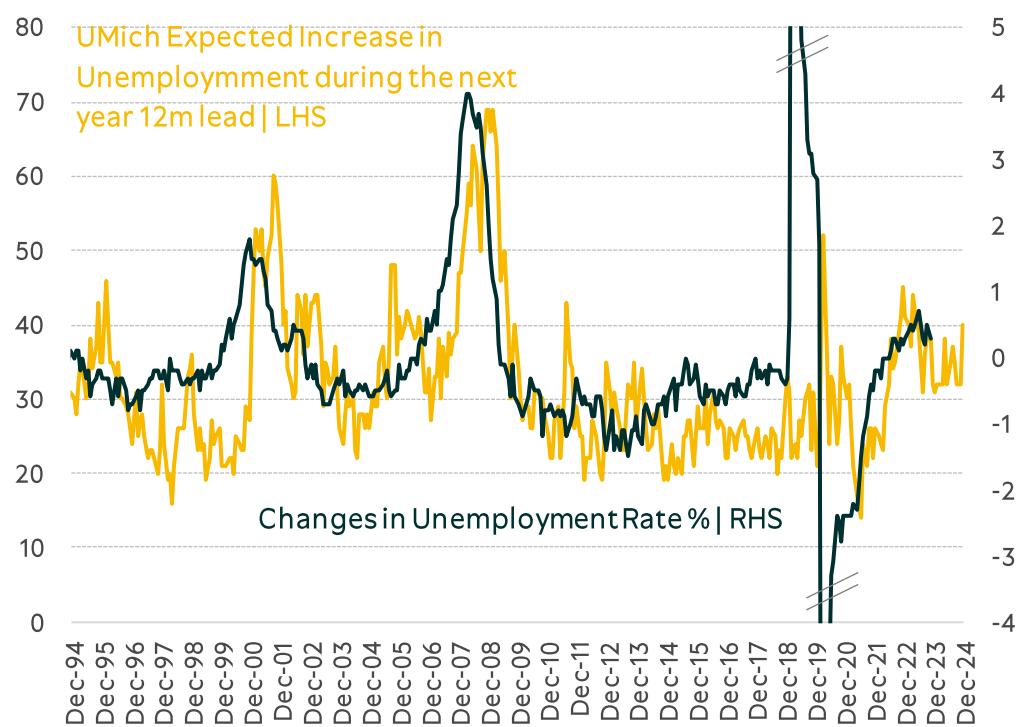

Nonfarm payrolls & Unemployment

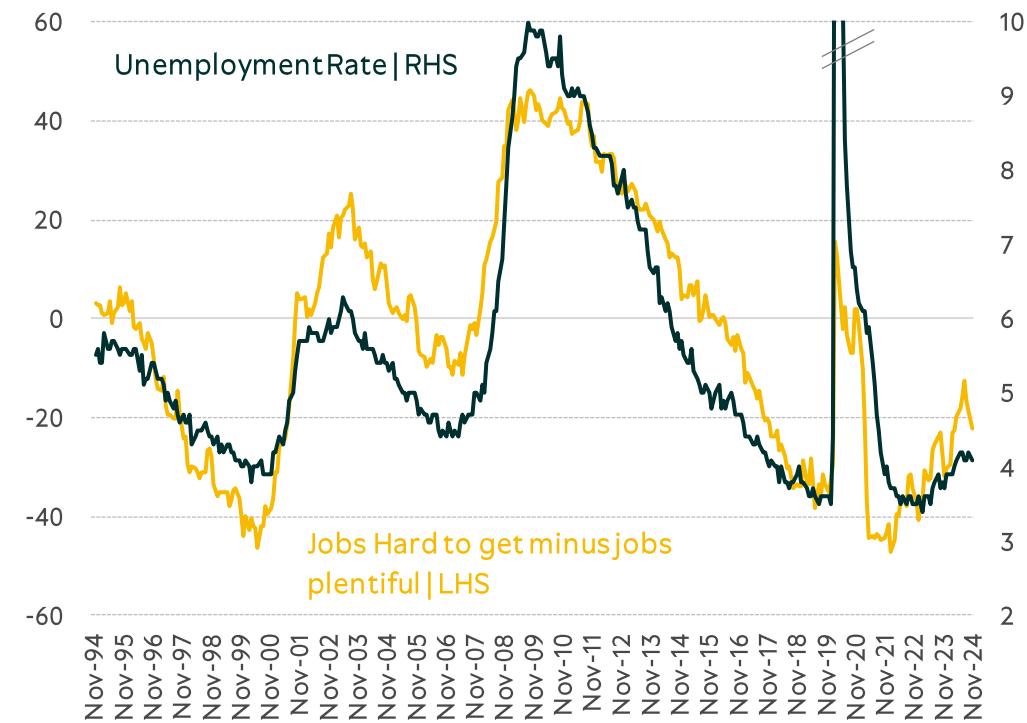

US Labor Market | Increase in unemployment expectations in December. The gap between those saying jobs were hard to get and jobs were plentiful narrowed for a third month running

Unemployment Rate & UMich expected increase in unemployment lyr ahead

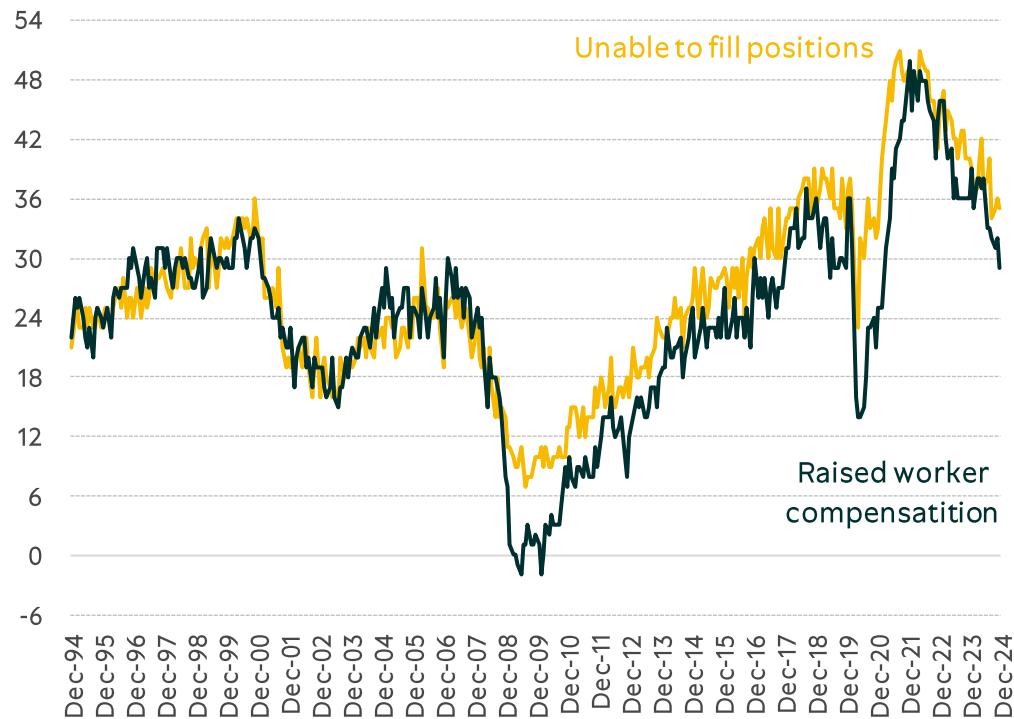

Conference Board Labor market differential & Unemployment rate

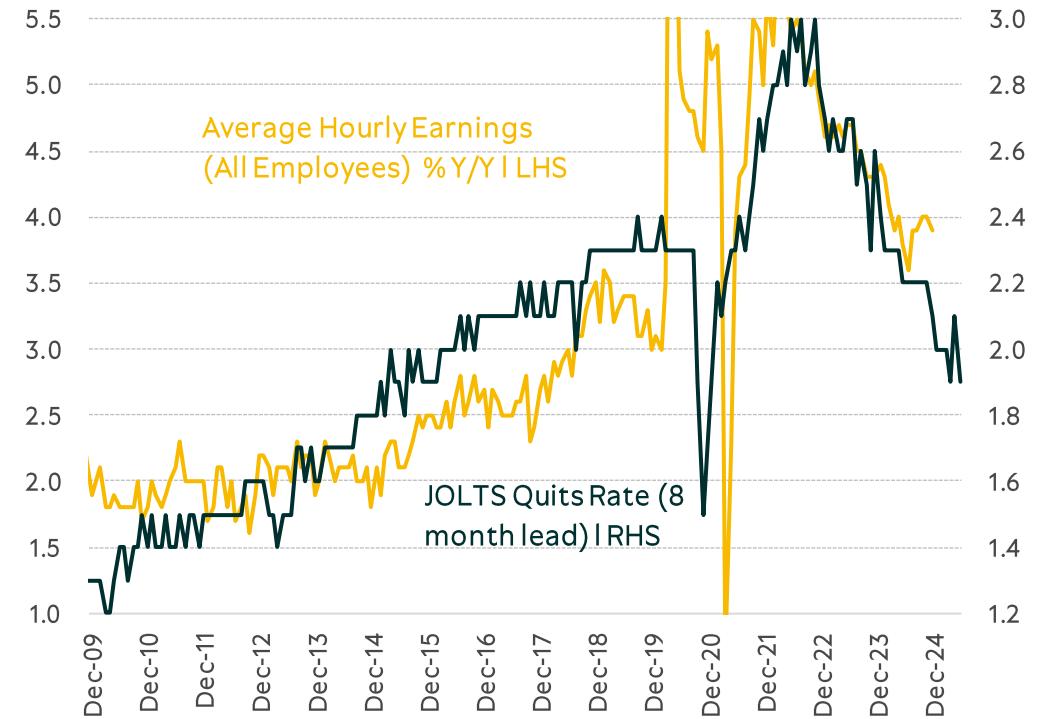

US Labor Market | NFIB survey and JOLTS Quits Rate remains positive for wage deceleration

US NFIB small business survey

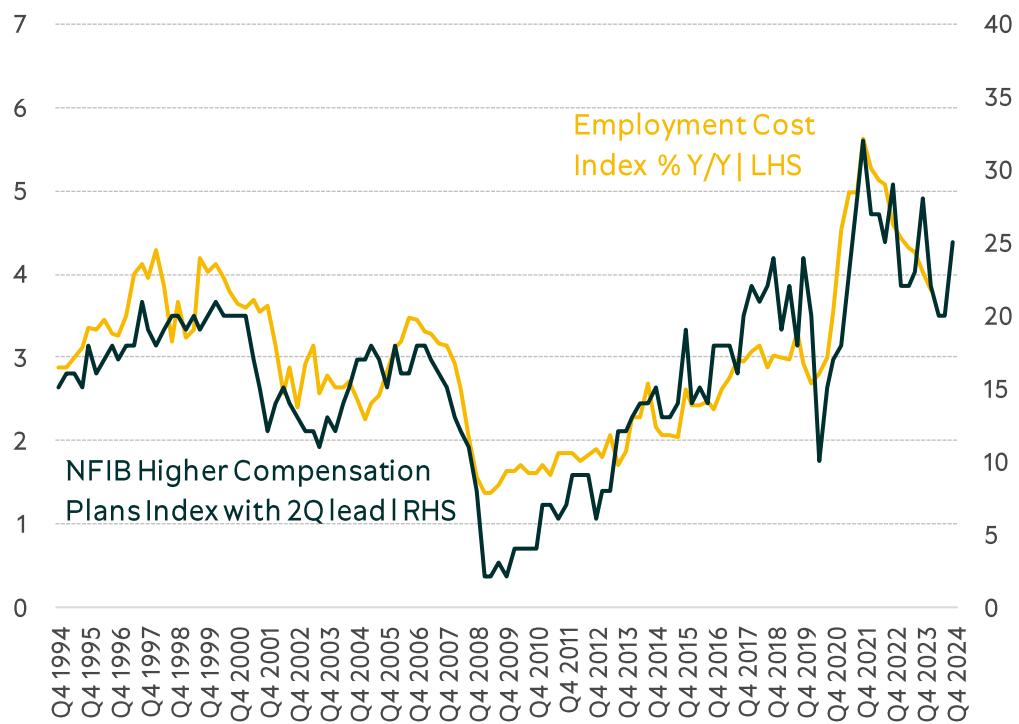

Wages & Quits Rate

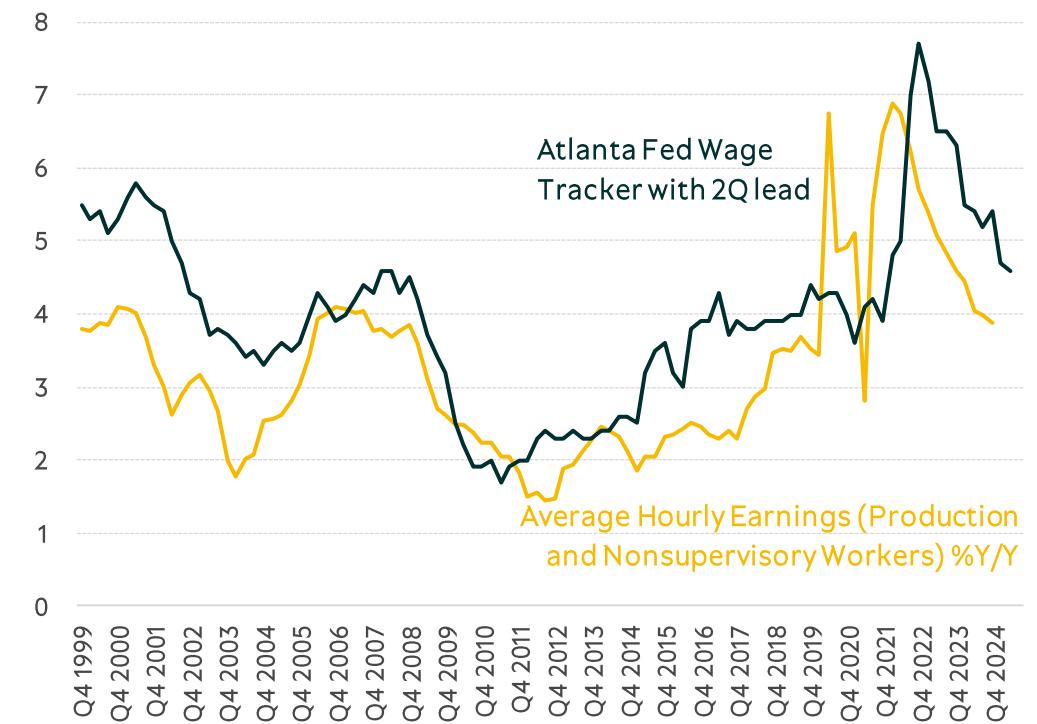

US Wage Tracker | Wage growth rates show signs of gradual deceleration, although approximately a third of small businesses continue to struggle to attract and retain qualified workers

Employment Cost & Leading Indicator

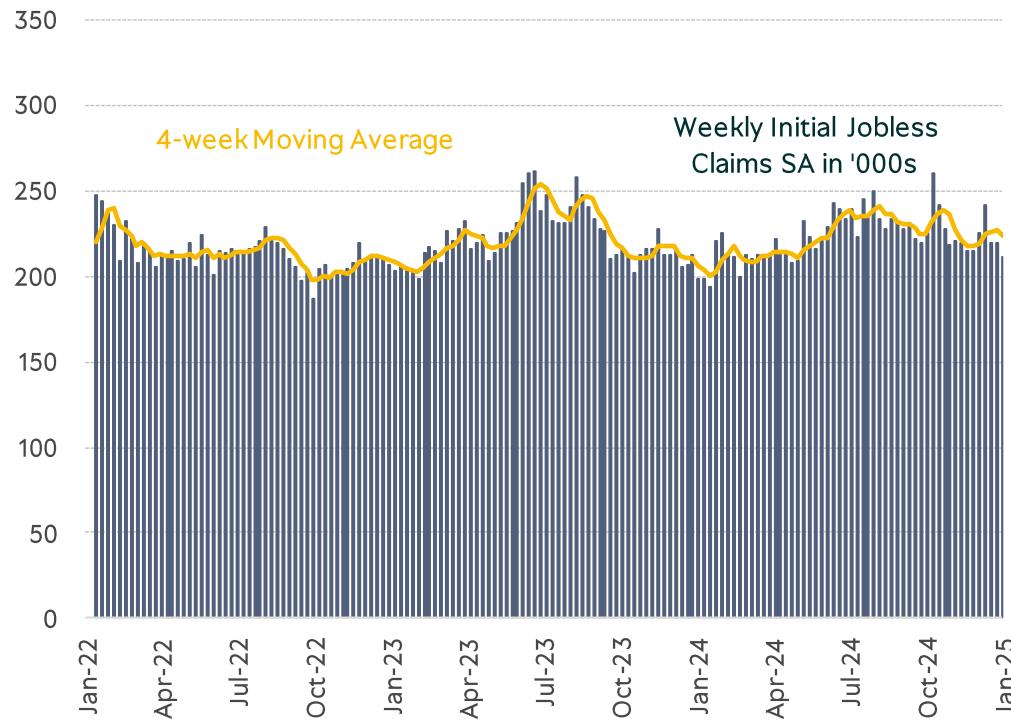

Wages & Leading Indicator

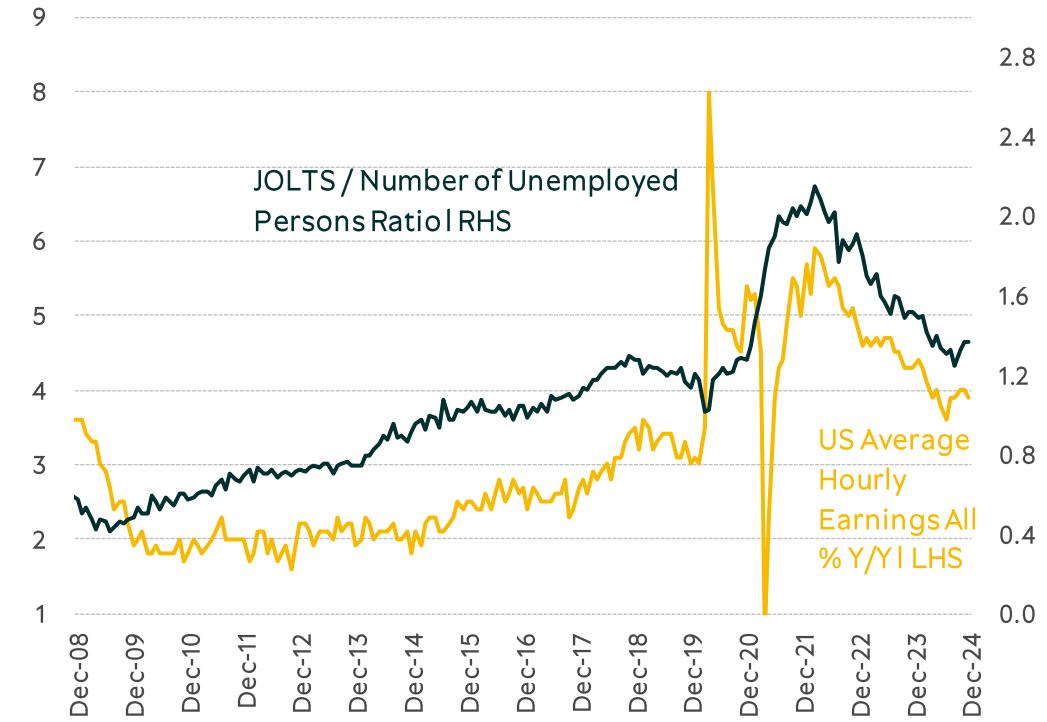

US Labor Market | Labor market is stabilising

Weekly Initial Jobless Claims

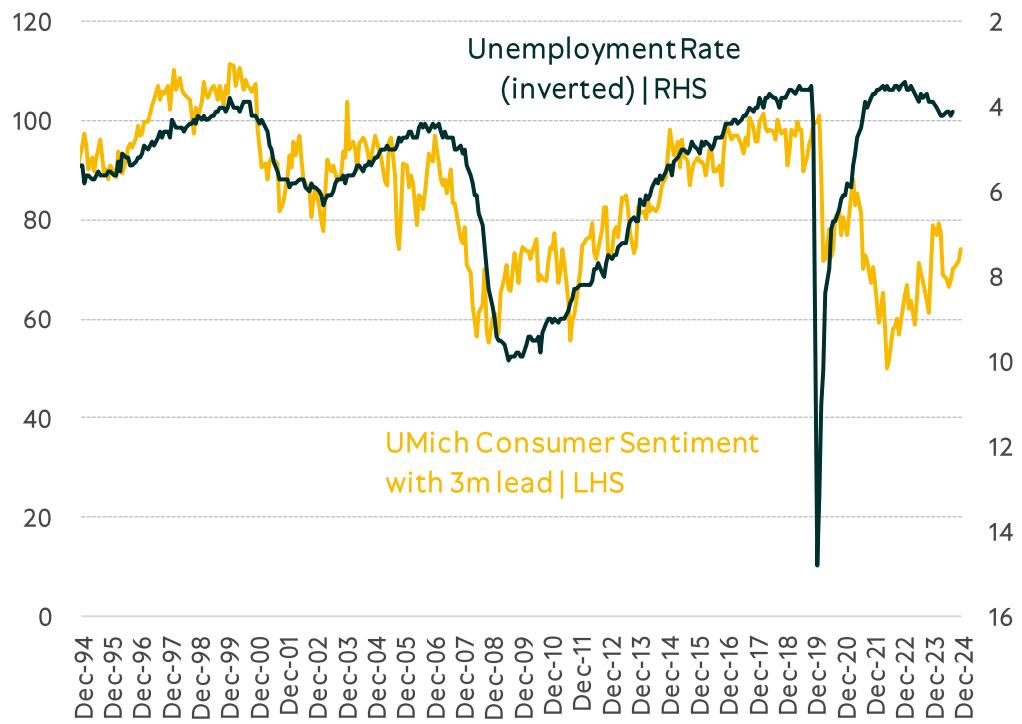

Demand & Supply in Labour Market

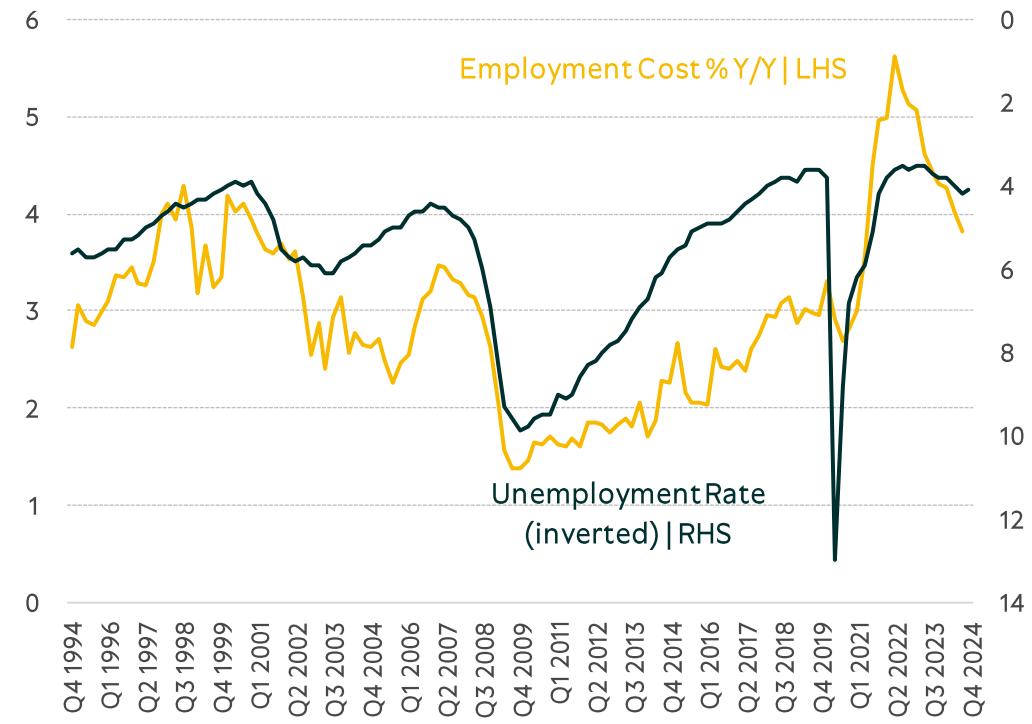

US Labor Market | Unemployment remains low with employment costs coming down slowly

Consumer Sentiment & Unemployment Rate

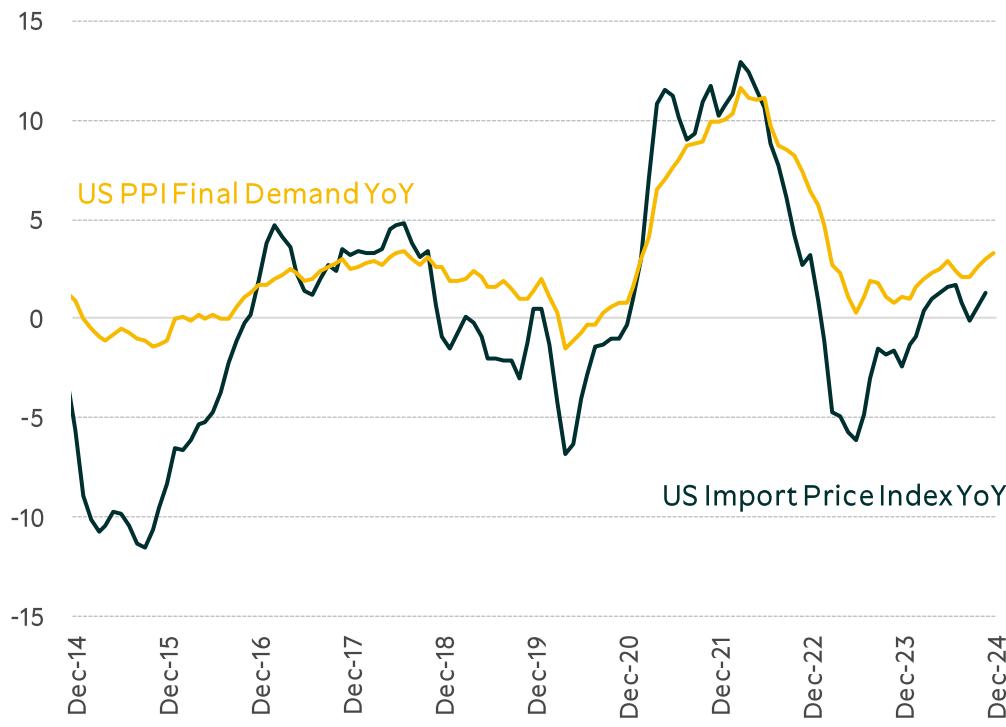

Compensation per Employee & Unemployment Rate

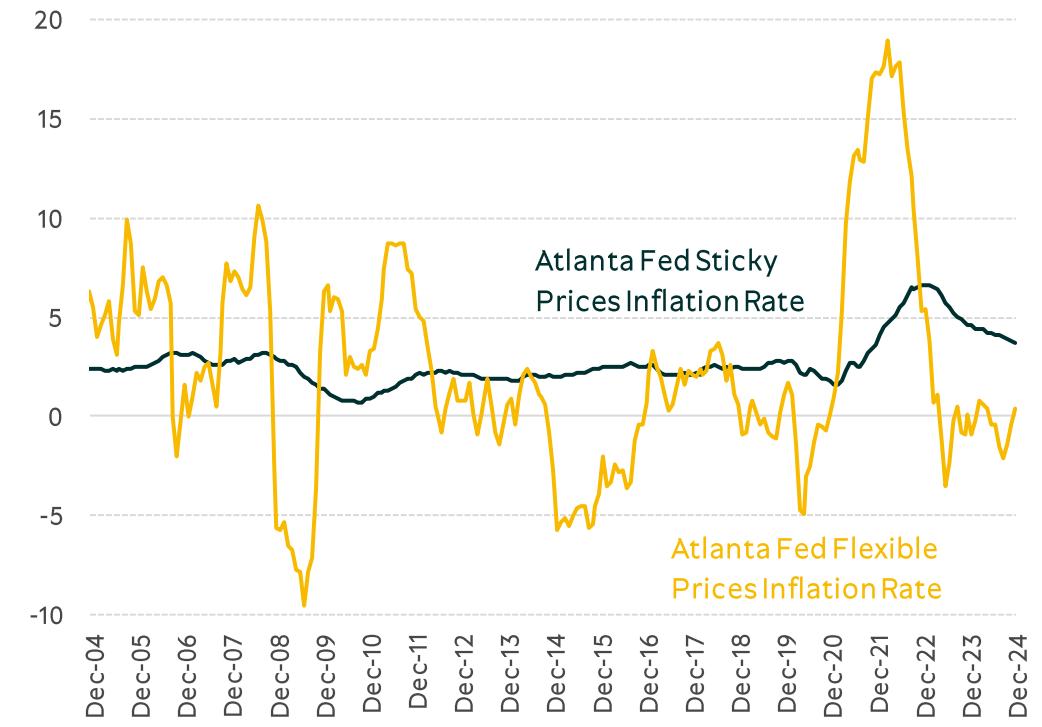

US Alternative Inflation Metrics | Inflation pressures have been limited to the sticky prices segment although there has been an uptick in flexible prices. US Producer prices in December above 3%

Producers Price Index and Import prices

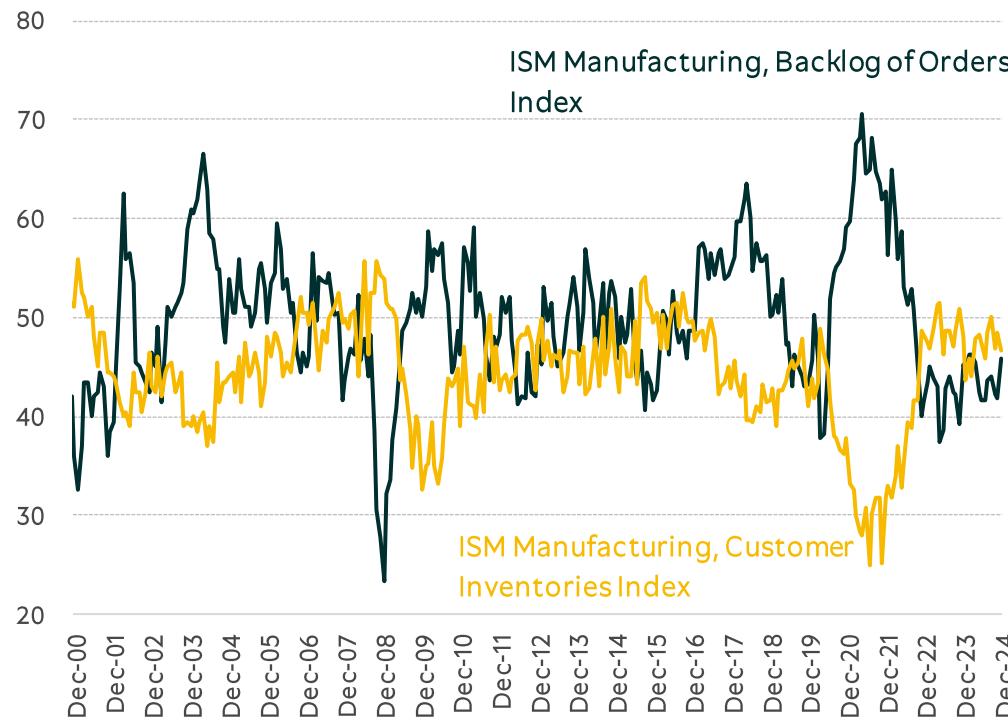

Sticky & Flexible Prices

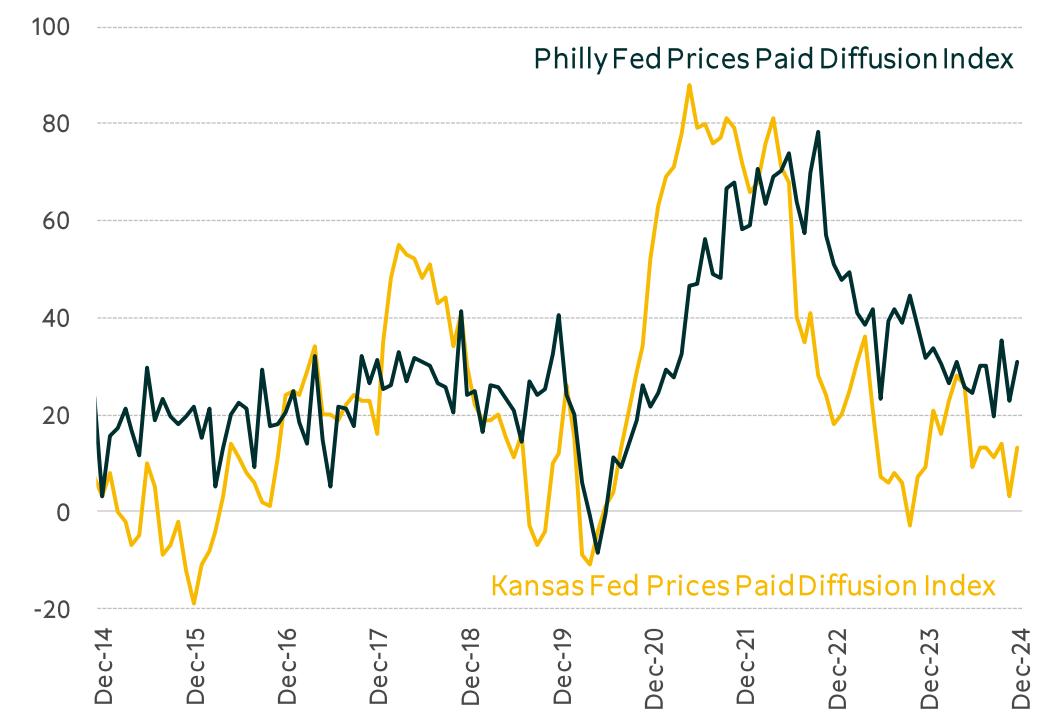

US Supply & Demand Gap | Customer inventories and backlog of orders are converging ; price pressures from regional surveys are once again on the rise
